

MEMORANDUM

Date: May 04, 2006
To: Water Right File 75-7352
From: Shelley Keer *SWK*
Re: Licensing Review

FIELD REPORT -- The original beneficial use field report for Permit 75-7352 was returned to Eastern Region in 1998 so that additional information concerning the diversion capacity could be added. The diversion capacity information was submitted, but the original beneficial use field report has not re-surfaced. Between the incomplete copy of the original field report and the diversion capacity information, there is sufficient information to issue a license without the original field report.

WATER DISTRICT -- This right is diverted within Water District 75E, which is currently inactive. I recommend licensing the right with a condition requiring the applicant to install a measuring device when notified by IDWR.

DIVERSION RATE -- An IDWR field agent measured a diversion capacity of 0.71 cfs in June of 2005. The right will be limited to the permitted rate of 0.60 cfs.

FUTURE REVIEW DATE FOR HYDROPOWER USES -- The term limit has generally been calculated as 10 years from the date of proof of beneficial use filing. Because the license is being issued more than 10 years after the proof was filed, I am recommending the date be 10 years from now.
