RE: App For Transfer 72440

Dear Doug;

I have completed my initial review of your application. I have been advised by our Boise office to include all of original irrigated land under cooling use in order to cover any land application of the waste water from the power plants that might occur; the enclosed ArcView map outlines the proposed place of use in red. Although I have been working closely with Pam Skaggs in Boise in completing my review, she now has to critique my work before the application can be advertised. I have no idea how long it will take her to complete her part of the process, but my part is done for now. If you wish to contact her directly, her number is 287-4951.

Regards,

James E. Stanton
Sr. Water Resource Agent
