RE: Application for Transfer

Dear Mr. Jernberg:

I received your request for information about changing water rights 31-02357, 31-02395, and 31-07311. Under Section 42-222, *Idaho Code*, you may apply to change the point of diversion, place of use, period of use, or nature of use of an existing water right. The Department of Water Resources (IDWR) will approve the application, called a transfer, if no other water rights are injured, the change does not result in the enlargement of the original right, the change is consistent with the conservation of water in Idaho, and the change is a beneficial use consistent with the local public interest. As you requested, I am faxing a transfer application form to your Montana number. I will also mail a better copy with the original of this letter.

As you prepare your transfer application, please pay special attention to the conditions addressing the watering of 663 acres of uncultivated pasture under right 31-07311. These conditions were placed on the license to allow irregular use of water to continue on the pasture without acknowledging that the use rises to the same level as irrigation of cultivated cropland. If you are contemplating changing the watering of pasture to the irrigation of cropland, you will need to support your transfer application with records showing the timing and amount of water use, in cubic feet per second and acre-feet, on the pasture land during each of the last five years that it was watered. When reviewing the transfer application, IDWR will evaluate your records and act to ensure that your proposal does not result in the use or consumption of more water than occurred under the original right. One possibility is that IDWR will approve the transfer with a reduction in acreage. Because of the complicated nature of this evaluation, it may be useful for you to obtain the services of a private irrigation expert to assist with your transfer application.

If you have any questions, please contact me at 208-327-7946.

Sincerely,

Shelley Walter Keen
Water Rights Supervisor

Department of Water Resources

Dear Sirs:

I would like to make a change in my water use if possible. Due to the higher cost of operation I would like to move or sell the part of water license 31-02357, and 31-02395 that I am using to irrigate the 663 acres of pasture land. I am using as much water on the pasture land as the farm ground, and I would like to put it to more beneficial use.

Due to the fact that I have 2 points of Diversion and the volume of water that these 2 wells produce I am using water license numbers 31-07311, 31-02357, and 31-02395 to irrigate the 1124 acres that I have licenses for. The licenses show that there is 1141 acres of water right.

Could you please advise me what I need to do.

Please Fax me the Info.

Dear Mr. Jernberg:

The date for proofs of Completion of Works and Application of water to beneficial use, as set out under terms of Permit No. G-30241 are due not later than Oct. 12, 1966

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list, which has been recorded in this department. If changes have been made and no amendments are on record, we advise you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least FORTY (40) DAYS BEFORE THE MENTIONED DATE, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used; the point, or points, of diversion; and the location of use or the lands which are irrigated - - all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with two Forms 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named, and before the notary public, as advertised in the publication notice.

Very truly yours,

Dear Mr. Thomas:

In submitting this Application for Permit, the source of water being the same as under Permit No. G-26615, I made an error in describing the land to be irrigated in Section 21.

The 22 acres shown to be irrigated in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ should read SE $\frac{1}{4}$ NW $\frac{1}{4}$.

If you will make the proper notation on the Application without returning it, I will appreciate it very much.
