Dear Mr. Tramp:

We are in receipt of your letter indicating that the legal description of the point of diversion for your Application for Permit No. 11-7026 is in error.

The procedure for correcting this error involves submitting an amended application and paying the statutory readvertisement fee of \$10. I would suggest, however, that it might be better to wait until the time that the examination is made for licensing to make this change. At that time, our examiner might find other corrections that need to be made, and it would save your amending the application and paying the re-advertisement fee a second time.

If you have any questions, please do not hesitate to contact this office.

In regard to your letter you sent us about Correcting the description of the Point of Diversion I don't understand what you mean by waiting until the time that the Examination is made for licensing. We wanted to get started on our Well as soon as possible. The Well digger said we don't even need a Permit for this type of well he just has to file it. I Can't see why it should Cost \$10. more just to change the description. Why not just fill in a new Application. Please let us know how soon as possible. Thank you

Re: Application No. 11-7026

Mr. Melvin L. Tramp
Box 71
Conda, ID 83230

Dear Mr. Tramp:

On July 6, 1972, we wrote you a letter advising you that you would need to amend your application if you wish to change the point of diversion. On July 10, we received a letter from you indicating that you see no reason to pay the extra \$10 for the change in the point of diversion concerning the above referenced application. The following is a quote from the Idaho Code:

Sec.42-211. AMENDED APPLICATION OR PERMIT - APPEALS

.....
.If amendment is made after publication of notice of the original application, said notice shall be republished following amendment, upon payment by the application of the statutory fee for republication as in this act provided. . . .

Therefore, it will be necessary for you to pay the \$10 republication fee if you wish to change the point of diversion on your application. The amended application must be advertised to allow anyone who feels they may be affected by the change to protest the new point of diversion.

The well driller is correct in advising you that a permit is not necessary to drill a well for use by a single family. Many waterusers do, however, file on this type of well to record the use of water. This puts on record the information necessary to protest the use against others who may make a subsequent use of water. There is no need to delay the construction of the well awaiting the issuance of this permit.

If you have any questions, please do not hesitate to contact this office.

Very truly yours,

Mr. Melvin L. Tramp

Dear Mr. Tramp:

C
We are in receipt of your letter indicating that the legal description of the point of diversion for your Application for Permit No. 11-7026 is in error.

P
The procedure for correcting this error involves submitting an amended application and paying the statutory readvertisement fee of \$10. I would suggest, however, that it might be better to wait until the time that the examination is made for licensing to make this change. At that time, our examiner might find other corrections that need to be made, and it would save your amending the application and paying the re-advertisement fee a second time.

If you have any questions, please do not hesitate to contact this office.

Very truly yours,

Y
