Dear Mr. Taylor:

When a license is issued it can be issued only for the amount of water and number of units found at the time of the field examination. If any further development occurs after that time then a new application must be filed for the additional use. If it were added to this permit it would be an expansion of the water right. We can send an application for permit to you when the additional lots are started.

We will issue your license for the 24 units found at the time of the examination within 10 days if we do not hear from you.

If you have further questions, please contact us.

RE: Permit Number 11-7016

Dear Ms. Grover:

Thank you for your assistance in adjusting our permit. However, my last letter failed to clarify the situation we are in at Emerald Beach. We have water hook-ups installed for 25 units (lots) and we are in the process of changing that to 29 lots (if approved) by November 30, 1979.

Can you issue us a permit for 25 units or 29 or could we have irrigation rights for the remaining 4 lots until the local authorities act on my request. I am trying to save an additional \$20.00 filing fee and your time and effort.

Could you hold my check and extend the application deadline until November 30? It should be settled by then.

Thank you for your help and consideration.

Best Regards,

Glenn Taylor

Dear Mr. Taylor:

In the course of issuing your license we note our 10-day notice letter failed to reach you. We had mailed it to Kaysville, Utah.

Therefore, in view of your letter of August 27, 1979, we propose to make certain changes on your permit.

When this permit was first applied for it designated domestic use for four homes and irrigation of 10.5 acres. However, when our field examiner did a field examination of the project he found no irrigation and enough hook-ups for 24 homes. We can amend your permit from irrigation to domestic and pick-up the 20 extra homes without any loss of priority. Your license would then be 0.27 cfs (which was the total amount of water being diverted at the time of the field exam) for 24 homes. Domestic use does include lawn irrigation. The acre foot amount would be 28.8 acre feet per annum.

We are enclosing a partially completed application for amendment form to be signed and returned with the \$20 filing fee within 10 days. If you do not concur with these findings, please contact us within this 15 day period.

Dear Mr. Taylor:

One of the conditions of approval of your water Permit No. 11-7016 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before August 1, 1975. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
