Re: Field Exam Request for Water Permit No. 63-10273

Dear Scott:

The department is processing the assignment for the above referenced permit. Also, the request for an expedited field exam has been noted.

The regional office traditionally tries to honor all requests for field exams. This first half of this year will most likely prevent this work from being completed due to the focus on completing the Snake River Basin Adjudication. However, the latter half of the year looks more promising.

This office will try to complete the field exam report and forward it to the licensing staff before the end of this year. The regional office is unable to speak for the priorities and schedules of the licensing staff other than to forward the request for expedited treatment to that staff.

Please let me know if you need more information or have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read 'Steve Lester'.

Steve Lester
Water Rights Supervisor
