Hi Kay:

No, I don't recall counting stubs at Terrace Lake. I recall counting stubs in other small subdivisions before but can't recall ever doing that for big ones like this. In big subdivisions I usually relied on some reasonable way such as:

- discussing how many lots are stubbed, getting details if number of existing homes plus stubbed lots did not equal total number of lots (some people with multiple lots but only 1 house etc.)

- taking a look around to see if a few random lots show evidence of stubs

- calling that good.

Hope that helps.

Another Friday almost done!.

Steve

Hi, Steve... I am working on licensing the Terrace Lakes permits that you and Lori did exams on. Shelley wants to know if the stubs for the 450 lots were actually counted or not. We cannot tell from the exams. I already checked with Lori and she said she did not physically count the stub-ins. I am wondering if you counted them or not - your exam does not specifically say that you did. If you could let me know, I would appreciate it. Thanks!! Kay
