

MEMORANDUM

TO: SHELLEY KEEN
FROM: DANIEL A. NELSON
DATE: 12/31/02
SUBJECT: PERMIT FOR 63-11275

RECEIVED

JAN 10 2003

Department of Water Resources

Shelley, I have done the data entry and arc view shapes in adhoc for this permit, 63-11275. I had already completed Beneficial Use Field Report on the old computer form, and it would have been too difficult to go through and add all the narrative and calculation sheets into comments in workflow (I used " ' " and other things that workflow doesn't like). So I decided it would be easier to use the standard form instead of trying to edit the entire document, and add a small comment in the narrative portion of adhoc.

The current owner Niman Mc Connell LLC has also changed their business name to Niman Ranches. They have submitted a change of ownership form that can be processed after the permit is licensed. The reason for this is because they have multiple rights that need changed and it seemed easier to do a change of ownership for all three rights rather than assignment of permit for one right and change of ownership for the other two.

We agreed to expedite the licensing of this permit, since they are working to rebuild the feedlot. They are planning on having approximately the same number of animals, but they want to rebuild the corrals to allow more room for the animals and set up the feedlot to be more efficient. They need the license to help get their new construction proposal to pass the Canyon County Planning and Zoning. **Therefore, could you please expedite the licensing of this permit? It shouldn't be too difficult.**
