Remarks: This application proposes to divert a hillside spring into a pipeline/trough system to provide stockwater anywhere on the Kincade home place, reducing livestock damage to riparian areas along Cassia Creek where it flows through their property. The applicants already have an instream stockwater right on this spring and on a smaller one nearby. The main spring is located about 1 mile SW of the Kincade ranch, which is located on both sides of Cassia Creek from 1 1/2 to 2 5/8 miles east of Conner. Cattle will drink from troughs near the spring as well as on the ranch.
