900 N. Skyline Dr., Suite A
Idaho Falls, ID 83402

Dear Dennis,

Attached you will find the Application for Transfer of Water Right. Nu-West would like to add a point of diversion to our existing water right 11-7546 that is associated with our well #10. This request is to provide a backup to well #10 and allow maintenance on the existing pump and still provide the plant with the necessary water to operate. It is not a request to increase water usage. This additional point of diversion would include drilling a new well and installing a pump that would tie into a common distribution system with well #10.

The enclosed application fee of \$410 is based on the permitted flow rate of this water right.

If you have any questions, I can be reached at 547-4381 extension 301.

Sincerely,

A handwritten signature in black ink, appearing to read "A. Skinner".

Alan E. Skinner
Engineer, Ponds
