MEMORANDUM

TO: File 67-7525

FROM: KAY WALKER

RE: Petition for Reconsideration

Date: March 9, 2006

.....

After issuance of the license of this permit a copy was sent to SRBA staff to include in their recommendations to the court for Basin 67. Upon their receipt of the copy of the license they determined that the point of diversion was in error. The former watermaster of Basin 67 had GPS'd the point of diversion for Steward Ditch and it was not located in the area previous examinations had determined. The watermaster found the point of diversion for Steward Ditch to be located within the SESE, S15, T14N, R1W, Adams County.

In order for the Department to be consistent in our records, we need to withdraw the preliminary order issuing the license, request a licensing amendment to change the permitted point of diversion and re-issue the license.
