Re: Application for Transfer #71551

To All Concerned,

We first would like to thank IDWR for their cooperation in providing us with documentation on the request to transfer water rights pertaining to this hearing.

Secondly, we do want it understood that the protest of the Redford water right was not done under malice or to hurt or harm anyone, but for CLARITY. When the law reads for a specific process to take place and we have to abide by such laws we then feel that all should be held to the same standards and it must pertain to all property owners. The referenced transfer has been taken illegally for 10 years under the "GOOD OLD BOY METHOD" and also not caring how it would effect the property of others.

If water was allowed to continue in their natural course, grounds would sub, individual wells would NOT dry up and it is the opinion of existing farmers that there would be plenty of water for irrigation use.

We also feel it is imperative to have proper measuring instruments so that water is administered in a consistent and accurate way.

Sincerely,

Mike and Eileen Chambers, et al

I'm so sorry, I forgot to include this!
