From: Jeff Peppersack 

Re: Conversation with Mike Creamer Regarding Generally Described Place of Use

Mike Creamer (Givens Pursley) called to discuss this water right and the possible need for a transfer to add water to be used at the point of diversion and place of use associated with the Shakespeare Festival location. A previous transfer split the decreed Boise River right from Boise Valley Irrigation Ditch Co. (BVIDC) to provide water at that Festival location. Mike was asking about the need for a transfer to allow additional water to be diverted at the diversion for the Shakespeare Festival. I recommended that Mike discuss the possibility of describing the place of use for the BVIDC as a generally described place of use for the service area with SRBA staff. That description may clear the way for future movement of water within the service area without a transfer.
