

RECOMMENDATION OF WATERMASTER

Application No:
Water Right No: Permit 37-21644
Applicant Name: Nelson/Johnson

Watermaster's Recommendation:

- a) ☐ I do not oppose approval of this application
- b) ☒ I do not oppose approval of this application if it is conditioned as follows:

Flow meter and lockable/controllable devices acceptable to watermaster
Domestic use for in-house only, no irrigation or other consumptive use
Any irrigation to occur under existing rights 36-8717 and 36-8740

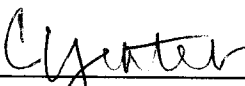

- c) ☐ I oppose approval of this application(s) for the following reasons:
- d) ☐ Additional comment:

The above irrigation rights total slightly over 5 acres but were not previously reporting to WD130 because we did not realize they were diverted out of a common well. They are supplemental and I believe are used minimally. Depending on the final system configuration, using a single well for diversion of all three rights, one or two flow meters might be necessary to measure total diversions.

The irrigation rights have already been petitioned to the North Snake GWD; this new right will not require mitigation due to the nonconsumptive use.

Dated: February 15, 2006

Water District 130

Cindy J Yenter, Watermaster
