Dear Ms. Gustafson:

Enclosed please find our firm's check in the amount of \$165.00 for the drilling permit for the above-numbered water permit. You indicated in your letter of February 3 that the drilling permit fee that should have been charged was \$200.00, and the driller obtained the permit for only a \$35.00 fee.

Please contact me if you have any questions or comments.

Drilling Permit No. 37-91-S-043

Dear Permit Holder:

Enclosed is a copy of the Proof of Beneficial Use and Drilling Report you submitted to this office on February 3, 1992. During my examination of your proof, an error has been detected that needs to be corrected before the final processing of the proof.

You indicate the total rate of diversion to be .13 cfs. If that is indeed the case, the drilling permit fee that should have been paid was \$200. The permit indicates you paid \$35 which leaves a balance due of \$165.

We apologize for the error made at that time. I will hold your proof due notice for 30 days without action. Please submit the additional \$165 before that time. As soon as I receive the additional fee, I will complete my examination and begin the licensing process.

If you have any questions or if I can be of further assistance, please feel free to contact me.

Sincerely,

Karen L. Gustafson

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is Approved

Date 4/3/91

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.

PROOF DUE NOTICE
RE: PERMIT NO. 37-08563

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before March 1, 1992. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson

Dear Mr. Slette:

Re: Permit No. 37-8563

Enclosed is a copy of the approved request for extension of time. The time within which to submit proof of beneficial use is extended to March 1, 1992.

The stated reason on the request for extension of time was that drilling permits are not being issued in Blaine County. That statement is not correct unless associated with applications for new irrigation in the approximate location of the Big Wood River Valley itself. The department has not ceased to consider actions on existing permits.

Gail Reiter should be aware of this information. He/she should work diligently toward the completion of this project during the construction period allowed by this extension since the department may not be able to grant additional requests.

If you have questions or concerns, please feel free to contact this office or the regional office in Twin Falls.

Sincerely,

RITA I. FLECK

RE: PERMIT NO. P37-08563

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

Re: Application for Permit No. 37-08563

Dear Mr. Slette:

The Department of Water Resources acknowledges receipt of the water right application for permit on behalf of Gail Reiter. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

This office will be advertising the application in the Wood River Journal on 11/15 & 11/22/89. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

Douglas Jones, E. I. T.
Water Resources Engineer
