Re: Transfer No. 72468

RECEIVED
FEB 14 2006
Idaho Department of Water Resources
Southern Region

This is to protest the removal of 37-7447A water right to a deep well located on Highway 26 in Gooding County and transfer to a dairy located North of Gooding.

This water right is in conjunction with water right 37-7447B and is responsible for watering 15 acres on one parcel and 20 acres on the B water right parcel.

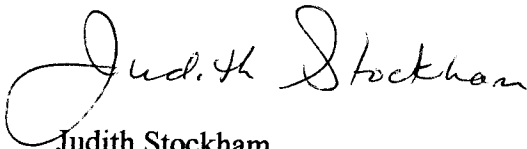

This is in a highly valued residential/agricultural area. The homes appraise and sell for over \$200,000. Without this water right this particular 15 acres will convert to dry lot acres.

There will be increased dust, fire, and insect danger from leaving 15 acres in the area without water. It will devalue the property and surrounding properties.

The ownership of the well head is shared and will need property line adjustment along with well pump adjustment.

As a bordering property, I feel the danger of fire, dust, and insects are far to great for such a transfer to be appropriate. Any fire created on the lot will be close to two houses and could conceivably spread to our alfalfa field and home.

Thank you

Judith Stockham
