SUBJECT: App for Transfer 71732 Robert Hoffman

Today Mr. Rogers (the protestant) came into my office to talk about this app. The north well (in Sec. 31) that serves this property belongs to the Baseline Pump Assn. #2 under Claim 37-2556A; Hoffman Claim 37-20621 covers this well. Rogers said that the well pumps open discharge to various properties, and that it would continue to do so without any reduction if this transfer is approved. Since Hoffman has no control of this well, any conditions on its use would be unenforcible.

The other well that is south of the Hoffman property runs into pressurized lines, but it also is not on his property; 37-20619 covers this well. The Rogers wells are south and east of this well. Rogers is concerned that the existing wells will continue to pump as before if this transfer is approved, and said that he would not relinquish his protest. I said that I would research the situation and put a memo in the file detailing what I had found so that the hearing officer would have access to this data.
