RE: App For Transfer 72270

Dear Steve;

I received your phone message stating that you were not going to pursue the transfer due to the ownership problem. Please sign the enclosed form before a notary before returning it to me for processing; one signature on the form is sufficient. Mr. Crouch should file his own change of ownership on this right, but that is his problem. I don't know if he plans to continue using the well, but apparently he is not willing to convey the right to you.

Without a water right, you are limited to 13,000 gallons of water per day from your present well. Up to 1/2 acre of land can be irrigated in connection with a home (1/2 acre in total, regardless of the number of homes on the property). As long as these limits are not exceeded, there should be no problem. If this much water was used every day of the year, 14.6 acre feet of water per year would be diverted. Your water right at the old property on Hwy. 93 was for 2.2 acre feet, and your present use does not appear to be that much different.

Regards,

James E. Stanton
Sr. Water Resource Agent
