

State of Idaho
Department of Water Resources

RECOMMENDATION OF WATERMASTER

Application No: Transfer 72270
Water Right No: 36-8484
Applicant Name: Brockman

Watermaster's Recommendation:

- a) ☐ I do not oppose approval of this application
- b) ☒ I do not oppose approval of this application if it is conditioned as follows:

Resolution of authority to file question (see below)
NO additional wells to be constructed (existing well only)
General measurement device condition only (067? – see comments)

- c) ☐ I oppose approval of this application(s) for the following reasons:

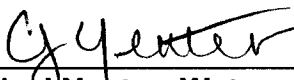

- d) ☒ Additional comment:

The old domestic well and pou for this right is on the property at the Crossroads Point development which is presently owned by Crouch. Do the applicants have the proper authority to transfer this water right? Do we have evidence that Brockmans retained this water right during the sale of the land? The domestic well was used this past summer at the old pou.

Mag meter condition is ridiculous for this right. To stay consistent with conditioning on other domestic or *de minimus* rights, drop 115 and go with general device requirement only.
