Dear Ms. Wegner:

The Department of Water Resources has received your application for transfer. Preliminary review of the application indicates that it is incomplete and cannot be accepted for processing. We are returning your application and filing fee (check # 4472 for \$290.00) to allow you to complete the necessary items. The required information is described below.

- The application was not signed by the applicant on page 7 (note that the signature has to be notarized).
- It appears that the application is missing a page (question #6. sections a, b, c, and d, Part 1) that needs to be completed. I have included a copy of this section of the application for your reference use.
- It appears that the application is proposing a new point of diversion (pipe), different than the historically used diversion point (ditch) for the rights. Question # 4 on the first page of the application refers to the new proposed diversion point (pipe). Therefore, the "local name for diversion" description should probably be left blank, rather than refer to the GPS tag #2588 which corresponds to the historical (old) diversion point location (ditch). Our office needs to know an approximate location of the proposed new diversion. This cannot be determined from the map that was included with the application. I have included a copy of an aerial photo that shows the location of the current diversion point. Marking and indicating the location of the new point of diversion on this map and resubmitting it with the rest of your application would be appreciated.

If you have any questions, or if I can be of any further assistance, feel free to contact me at your convenience.

Sincerely,

Corey Skinner, PE
Water Resource Engineer
