NOTES

Unless otherwise shown, joints in pipe shall be Type R joints. At angle joints which do not require miter bends, long radius curves (vertical and horizontal) shall be constructed by pulling joints.

Stations shown are approximate and may be worked as directed.

Structure locations and symbols are not shown to scale.

Minimum pipe cover shall be 4'.

Where a delivery connection of lateral pipe crosses an existing conduit, a minimum clear distance between pipeline and conduit of 1' shall be provided.

Unless otherwise shown or directed.

Hydraulic gradients shown are for design Q.

Where shown on plan and profile, the abbreviation "Pxy" refers to "pressure reducing valve".

The abbreviations S.O.A. and M.E. shown on drawings pertaining to access/cement pipe denote "machined over all" and "machined each end", respectively.

Lateral elevation of delivery pipe shall be the same as vertical elevation unless otherwise shown.

Pipe sizes 12 inches and larger shall be installed in vial access boxes as shown on Dwg. 915-D-21.

The above notes apply to all plan and profile drawings.

10' L and E.O.L. as shown on the General Plan mean Beginning of Line and End of Line, respectively.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 95-8057, and said application is hereby approved _____.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 85.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. Other:

An access port or other device as specified by the Department shall be installed by the permit holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department. The issuance of this permit in no way grants any right-of-way or easement across the land of another.

PROOF DUE NOTICE

RE: PERMIT NO. 95-08057

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before December 1, 1995. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary
