State of Idaho
Department of Water Resources

WATER RIGHT LICENSE

WATER RIGHT NO. 95-7786

Priority: September 20, 1977 Amount: .02 CFS 1.2 AFA

This is to certify, that A. L. REBILLARD
BEULAH REBILLARD

E. 3322 16TH
SPOKANE, WA 99203

has complied with the terms and conditions of the permit issued pursuant to Application for Permit dated September 20, 1977, and has submitted proof to the Department of Water Resources on January 5, 1984, that water has been applied to a beneficial use; an examination by the Department indicates that the works have a diversion capacity of .02 cfs of water from;

HAYDEN LAKE tributary to SINKS

and that a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>VOLUME</u>
Domestic	03/15 to 11/15	.02 cfs	1.2 afa

LOCATION OF POINT OF DIVERSION(S): LOT 1(NENE), Sec. 20, Township 51N, Range 3W
Kootenai County

PLACE OF USE: Domestic

TWN RGE SEC

51N 3W 20 LOT 1(NENE)

CONDITIONS/REMARKS:

1. The right to the use of the water hereby confirmed is limited to the amount which can actually be beneficially used and is restricted and appurtenant to the lands or place of use and to the purpose herein described, as provided by the laws of Idaho.
2. This right is subject to all prior water rights and may be forfeited by five years of non-use.
3. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 27 day of August, 1987.

MICROFILMED

SEP 29 1987

By Director

DAVID B. SHAW

BEFORE THE DIRECTOR OF THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

IN THE MATTER OF PROTESTS AGAINST APPROVAL
OF APPLICATION FOR PERMIT NO. 95-7786 IN THE
NAME OF A. L. REBILLARD &/OR BEULAH REBILLARD

MEMORANDUM DECISION
AND ORDER

On September 20, 1977, A. L. and/or Beulah Rebillard of Spokane, Washington filed with the Department of Water Resources an application for permit to appropriate 0.02 cubic foot per second of water from Hayden Lake to be diverted within Government Lot 1, Sec. 20, Twp. 51N, Rge. 3W, B.M., Kootenai County, to be used for domestic purposes from March 15 to November 15.

Notice of this application was published in the Coeur d'Alene Press, Coeur d'Alene, Idaho on September 29 and October 6, 1977. On October 6, 1977, the Department received a protest against the granting of a permit from Honeysuckle Hills Owners Association, Inc.

A conference on the matter was held at Coeur d'Alene, Idaho on January 26, 1978. The applicants and protestant were present and represented themselves. Testimony was heard from both the applicants and protestant and it was agreed by both parties that the Department should reach a decision in the matter based upon the conference.

FINDINGS OF FACT

1. The center of conflict between the applicants, A. L. and/or Beulah Rebillard, and the protestant, Honeysuckle Hills Owners Association, Inc. is not whether applicants take water from Hayden Lake pursuant to their application, but rather whether the applicants can withdraw from the Honeysuckle Hills Owners Association without paying to the association of \$1,000.00 assessment to pay for a new well and distribution system recently constructed by the association.

2. The Honeysuckle Hills Owners Association, Inc. presently supplies the applicants with water from the same source as proposed by the applicants.

3. The protestant would refuse to supply the applicants with water if he resigns his membership and no longer pays his water bills.

4. Injury to the water right of the protestant was not raised as an issue.

CONCLUSIONS OF LAW

1. The conflict between the applicants and the protestant regarding whether the applicants are liable for the assessment for the new water system is

not a matter that can be considered by the Director in making his decision on this application.

2. There would not be a duplication of water rights if the protestant no longer delivers water to the applicant.

3. The water right of the protestant will not be injured by the appropriation of water by the applicant.

ORDER

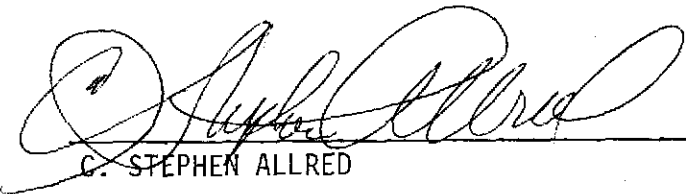

IT IS, THEREFORE, HEREBY ORDERED that Application for Permit No. 95-7786 is APPROVED subject to the following conditions:

1. This permit is subject to all prior existing water rights.

2. The combined rate of diversion under this permit and water supplied by Honeysuckle Hills Owners Association, Inc. for the same use shall not exceed 0.02 cfs.

3. Proof of construction of works and application of water to beneficial use shall be submitted to the Department of Water Resources on or before March 1, 1984.

Dated this 26 day of March, 1979

AFFIDAVIT OF PUBLICATION

NOTICE OF APPLICATION FOR WATER PERMIT

Notice is hereby given that A. L. &/or Beulah Rebillard, E. 3322 16th, Spokane, Wa., has on September 20, 1977 submitted Application No. 95-7786 for a permit to appropriate 0.02 cubic feet per second of water from Hayden Lake by means of a pump & pipeline within the Gov. Lot 1, Sec. 20, T51N, R3W, B.M., Kootenai County to be used from March 15 to Nov. 15 for domestic purposes within the Gov. Lot 1, Sec. 20, T51N, R3W, B.M.

If issued, this permit will be subject to all prior water rights. Protests against the granting of the permit must be filed with the Idaho Department of Water Resources, 4055 Government Way, Coeur d'Alene, Idaho 83814, on or before October 17, 1977.

To Members of Honeysuckle Hills Owners Assn., Inc.

I found the attached article in the Los Angeles Times which is self-explanatory. I have checked into the way it would effect our new operation, that is with the well instead of the lake, and found we would not need this program after we got off the lake.

This should be another justification for drilling the well and get away from surface water, such as the lake water.

The meeting scheduled for January 27th will be cancelled due to the weather. It was felt that you had all the information available. We will be able to complete all the business at the annual meeting.

Best Regards and a Happy New Year.

EPA Plans Rules on Water Purity

Would Require Cities
to Curb Carcinogens

BY MARGOT HORNBLOWER

The Washington Post

WASHINGTON—The Environmental Protection Agency will propose in January the government's first comprehensive regulations restricting cancer-causing chemicals in drinking water.

The move is expected to spark widespread controversy when financially pressed cities are forced to spend millions of dollars on new water-treatment methods, passing the costs on to consumers in higher water bills.

The proposed regulations, the subject of much speculation for more than three years, are reopening the emotional debate over the safety of the nation's most basic commodity, pitting environmentalists against city officials, with the EPA in the middle.

The alarming discovery that drinking water might contain small amounts of cancer-causing substances was first disclosed in November, 1974, when an EPA study found 66 chemicals in New Orleans' water supply.

Two weeks later, reviving a bill that had languished for four years, Congress passed the Safe Drinking Water Act requiring federal standards for the nation's 240,000 hitherto independent water supply systems.

Please Turn to Page 15, Col. 1

Los Angeles Times Dec. 27, 1977

EPA Will Propose Rules to Curb Chemicals in Drinking Water That Cause Cancer

Continued from First Page

Since then an EPA survey of 80 cities' water systems found chemicals in all of them, including chloroform, aldrin, dieldrin, DDT, carbon tetrachloride and benzene—all of which cause cancer in animals. In addition, several studies have found higher cancer rates among people drinking chlorinated river water as compared to nonchlorinated ground water.

The EPA estimates that under its proposed regulations between 61 and 78 cities would need to switch from traditional sand-filtering techniques to running the water through granulated activated carbon beds, an expensive process because the carbon, which absorbs chemicals, must be changed as frequently as every eight weeks.

The result would be a massive national construction program over the next five years costing between \$291 million and \$685 million with annual operating costs of \$34 million to \$92 million, all of which would be paid out of city budgets. In contrast to its large subsidies for sewage plants, the federal government provides virtually no funds for drinking-water treatment.

Victor J. Kimm, EPA deputy director for water supply, said the agency had not determined exactly what cities would initially be subject to the regulations, which must go through public hearings after being formally proposed. He said the agency was considering cities with populations of 75,000 or more but that cutoff was not definite. If cities over 75,000 were involved, about half of the 190 million persons who use public water supplies would be affected.

All of the cities would be required to monitor their water regularly. Because quality varies dramatically from region to region, some would have to make only minor adjustments in their treatment plants.

A new plant for a city of 80,000 would cost \$2 million to \$5 million with a per capita increase in water bills of \$3.80 to \$11 a year. A city of more than 1 million would pay \$12 million to \$27 million with a per capita water bill increase of \$2.20 to \$6.50 the EPA said.

Many local officials are skeptical of EPA's cost figures. A spokesman for the city of Philadelphia estimates its average household water bill would be increased from \$45 to \$71 a year. Cincinnati predicts an increase from \$40 to \$65.

"The cost of treating this water is going to come as quite a shock to most cities, where people think water is a free, God-given right," Oscar Adams of the Virginia Health Department said. "Most state water people are not convinced there is a public health problem. You have many carcinogens in the environment, whether it's sweeteners in Coke or chloroform in toothpaste. Are we going to save that many people by making all these changes in water treatment?"

The city of Richmond, Va., which takes its water from the polluted James River, estimated last week that a new carbon system would cost \$10 million to build and \$900,000 a year to maintain, thus increasing water bills by 27% or \$3.91 a person a year.

With sophisticated new instruments to detect minute traces of chemicals "we are finding a whole variety of new substances we were not able to measure before," the EPA's Kimm said.

"The adverse health effects are potentially very serious . . . But it's very hard to say how big the risk is. We're at the limits of what's understood in the scientific community."

The proposed EPA regulations would set a limit of 100 parts per billion for a group of chemicals called trihalomethanes, of which chloroform is the best known. These organic chemicals are formed when natural substances such as decaying leaves or sewage mix with chlorine, used as a disinfectant.

The regulations would try to reduce synthetic or man-made chemicals that flow into rivers from farms, industrial waste pipes and urban runoff. Cities that take water from dirty rivers, rather than underground aquifers or upstream reservoirs, would be required to install carbon filtering equipment.

Kimm sees the regulations as "an insurance policy" despite scientific doubts over how many persons might die from ingesting small amounts of chemicals over a lifetime.

But the engineers and politicians who run the nation's water supplies would rather wait for more certainty. "It's accepted that chloroform causes cancer in test animals, but not that it causes it in man from trace quantities in drinking water," Eric Johnson, head of the American Waterworks Assn., said. "Until it's proved to be bad, I'd prefer to believe it isn't. Municipalities have plenty of things to spend their money on."

The controversy echoes the classic environmental health battles over problems such as pesticides, air pollution and saccharin. Although most scientists accept the correlation between high doses in test animals and low doses in humans over the long term, many laymen would prefer evidence of deaths before accepting the scary ubiquity of cancer-causing substances.

Robert Harris, a scientist with the Environmental Defense Fund, which has sued the EPA for delaying the regulations, applauds the proposed regulations, which go

far beyond what was contemplated by the Gerald R. Ford administration.

When EPA Administrator Douglas Costle took office, he was presented with a proposal that limited trihalomethanes but did not address synthetic chemicals. After a meeting with Harris and consumer activist Ralph Nader, the current, more controversial proposals were drafted.

However, the agency has yet to deal with what some consider an equally serious hazard: the leaching of lead and cadmium into drinking water from antiquated distribution pipes. Soft water, such as that in Boston, Seattle and Montgomery County, Md., corrodes pipes, and the ingestion of heavy metals could cause mental retardation, hypertension and kidney damage, Harris said.

1-2678

We hereby agree to allow the Department of
Water Resources to render a decision on
Application No. 95-7786 based on the conference
and information in the file and a brief by the
Association Attorney and response if filed within
30 days.

Att: Robert Haynes, P E.

Dear Mr Hay nes.

We would appreciate a continuance of the hearing at your office
for 3PM, Thursday January 26th, 1978 as our attorney will be
out of town on that date and Mr Williams, our president is out of the
State for a time.

There appears to be a need for an answer to a legal question before
the hearing,

Yours truly,

Superintendent

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

In the Matter of Protest Against Approval)
of Application for Permit No. 95-7786, in)
the name of A. L. &/or Buelah Rebillard.)
_____)

NOTICE OF CONFERENCE
AND/OR HEARING

On September 20, 1977, A. L. &/or Buelah Rebillard filed with the Department of Water Resources an application to appropriate the public waters of the State of Idaho. The Department received protest against approval of said application on October 6, 1977, from Honeysuckle Hills Owners Association, Inc.

The Department has set the matter of protest for conference and/or hearing for Thursday, January 26, 1978, at 3:00 p.m. in the Supervisor's office of the Department of Water Resources, Coeur d'Alene, Idaho. Any hearing will be held in accordance with the Rules and Regulations of the Idaho Code and adopted Rules of Practice and Procedure of the Department of Water Resources. Opportunity shall be afforded all parties to respond and present evidence and argument on all issues involved.

Any party may request in writing five (5) days before any hearing that the oral proceedings thereof be taken in the form of stenographic notes. Any party may have such stenographic notes of the oral proceedings, or part thereof, transcribed at his own expense. A taped record of the proceedings will be maintained for the appeal period.

Failure to appear at the time and place set for hearing by the applicant or protestant may allow the Department without prejudice to dismiss the protest or the application. Any and all cost incurred by reason of such non-appearance may be assessed against such non-appearing parties.

Dated this 13 day of January, 1978.

Re: 95-7786 - Rebillard

A. L. Rebillard
E. 3322 16th St.
Spokane, WA 99203

Dear Mr. and Mrs. Rebillard:

Enclosed is a copy of a protest filed against the issuance of a permit pursuant to your Application No. 95-7786. The Department suggests you contact the protestant directly in an effort to determine the nature of the protest and to attempt to resolve the protest.

If you do not advise us within twenty (20) days that the protest has been resolved, the matter will be scheduled for conference and/or hearing. At such a conference and/or hearing, the following are the principle items the Department can consider in either approving or denying the application for permit (Section 42-203, IDAHO CODE):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

If this office can be of further assistance, please contact us.

Sincerely,

ROBERT G. HAYNES, P.E.
Regional Supervisor

Department of Water Resources
Northern District Office

C. Stephen Allred, Director
Dept. of Water Resources Board
4055 Government Way
Coeur d'Alene, Idaho 83814

Dear Sir:

Refer Application by L &/ or Beulah Rebillard of E. 3322
16th, Spokane, Wa., for Water from Hayden Lake. Published
Sept. 29 & Oct. 6, 1977.

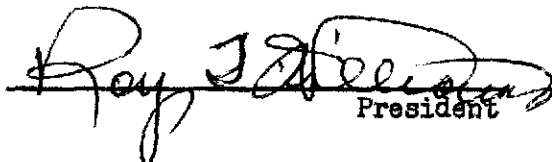

We wish to protest this Application for the following
reasons.

- (1) They are now receiving Water from the Lake through
the Honeysuckle Hills Owners Assn. System, which
line runs by them and has for a number of years.
- (2) His Water is included in our Application made in
1952 and has been available to him ever since.
- (3) Honeysuckle Hills Owners Assn. has drilled a well
at Honeysuckle Ave. and Government Way under Idaho
Water Resource Board Permit with Ample Water for all
their needs, including Mr. & Mrs. Rebillard.
Our Application for the Well included their Home use
and was Approved.

Therefore for the above reasons we respectfully request
the Honorable Board to deny their Application.

Sincerely,

Honeysuckle Hills Owners Assn, Inc.
