Re: Water Right Permit #95-7680

Dear Mr. Iverson:

The rate of diversion from your well, required for you to obtain approval on your water right permit number 95-7680, was determined today (October 8, 1981). The method used was direct volumetric measurement as follows:

The pump was turned on and allowed to run at free discharge for a period of drawdown and stabilization;

Flow was measured at a point within 20 feet of the well site with control valves full open, free discharge from the pipe, and, no other point of discharge;

The average of five observations was obtained.

I certify that the flow rate, as determined above, is 109 gallons per minute.
