

Only our single-stage "30" Jet Pump has all the features that combine to give you constant city-main dependability

✓ Reserve Pressure
Holds pressure at 30 to 50 lbs., 50% more than industry standards

✓ Reserve Power
Capacitor motors produce almost twice their rated HP

✓ Emergency Drive
Connects to any gasoline motor, even a lawn mower, if power fails

✓ 3-position Switch
OFF... AUTOMATIC, for everyday use... ON, for maximum pressure

Sears Roebuck

1/2-HP Pump without jet or tank \$79.95 cash \$8 monthly

Provides tremendous volume from shallow wells, yet available in a size that can pull from wells to 110 feet

Our best single-stage jet pump. Mounts to tank in seconds with special quick-connect flange. Just loosen four bolts to remove motor for servicing—no need to tear down the entire pump. Jets sold separately below. For easier, longer-lasting installation, use flexible plastic pipe (see page 1197).

1/2-HP model is for shallow wells only (to 22 ft.), 110-120-v., 60-c. AC. 3/4, 1 and 1-HP models are for 110-120 or 220-240-v., 60-c. AC. Tanks referred to in chart are our glass-lined models (see page 1177). For best performance, order pump and one of our non-sweat insulated tanks (see page 1177).

Sears Submersible "40" Pumps. tested 5 ways to assure perfect operation at depths to 450-feet

Convenient, compact control box provides simple, remote operation of your pump from the location you prefer

All this is tested for you:

- The hydraulic performance
- Complete motor waterproofing
- Vibration-free operation
- Full-power motor smoothness
- Completely accurate dimensions

1/2 HP \$179.95 cash \$6.50 monthly

1 Sears low prices for submersible pumps include all this: automatic overload protector, air volume control, pilot light, built-in check valve, precision cast impellers, control box that houses condensers, pressure gauge and reset button... even a special hook devised to guard against dropping pump during installation. Delivers big 40-60 lbs. high pressure. High-power capacitor motors produce almost twice their actual rated horsepower. Completely automatic... preset switch turns pump on at 40 lbs. pressure, off at 60 lbs. No power waste in overcoming friction because water is whirled up by centrifugal force. Motor completely sealed against moisture... noiseless, too.

For 4-in. or larger wells. Installation is simple... needs just one run of 1-in., 125-lb. test flexible plastic pipe (for depths

Chart shows gallons-per-hour at 40-pound pressure... not listed unless pump can produce 60 pounds at that depth.

Depth in feet...	20	40	60	80	100	120	140	160	180	200	220	240	260	280	300	320	360	400	450

3 Three-wire Connecting Cable. Specially engineered to withstand many years of underwater use. Has a tough, high-quality neoprene rubber outer coating that's impervious to rust and corrosion.

To simplify installation, all Sears cable comes complete with a connecting kit. This kit includes three waterproof connectors which will enable you to make splices that are completely leakproof.

Use with all submersibles listed on this page. Must be used when making the electrical connection between pump and control box. Chart below shows maximum lengths with which each size of cable may be used with the different size submersible pumps.

No. 12 Cable. Shipping weight per foot 3 ounces.

*Combined length of cable and above-ground wire.

When choosing a pump, be sure to select one that will meet your requirements from your well depth, water level in well and well-casing diameter. Use a shallow-well pump for wells to 22 feet, a deep-well model for deeper wells. While 20 to 40 lbs. pressure is adequate, 30 to 50 or 40 to 60 lbs. is best for home use. For help in choosing a pump, write Sears; order FREE estimate 39 G 6558.

SHIPPING NOTE: "N" items (as 42 G 2832N2) are sent by freight (rail or truck) or by express.

to 150 feet), and simple electrical connection—between pump and control box. Use strong synthetic rope to connect pump safety collar to well seal. 1-inch rigid or galvanized pipe may be used for wells over 150 feet deep (see index).

Order cable and well seal below (seal includes torque snubber to prevent pump twisting). Check table below for well depth and capacity you need. For 60-c. AC. Not for use in sandy wells. Be sure to see tanks on page 1177.

NOTICE OF APPLICATION FOR WATER

Notice is hereby given that Charles B. White has on November 27, 1967 applied for permit to divert 0.02 cubic feet per second of water from a subterranean source under application No. 95-7003. Water will be diverted by a well with in the Lot No. 3, Sec. 10, T. 50 N, R. 5 W, B. M., Kootenai County and is to be used from January 1 to December 31 for domestic purposes in Lot No 3, Sec. 10, T. 50 N, R. 5 W, B. M.

Any protest against this application must be filed with the Department of Reclamation within ten days from the last date of publication of this notice.

R. KEITH HIGGINSON
State Reclamation Engineer

THIS IS TO CERTIFY, that CHARLES B. WHITE
 of Spokane, Washington, made application for a permit to appropriate the public waters of
 the State of Idaho, dated November 27, 1967; that Permit 95-7003 was issued pursuant
 to said application; that the proposed works were completed on or about December 12, 1968,
 with a storage/or carrying capacity of 0.03 c.f.s., said works consisting of _____
well and pump; and that on December 12, 1968,
 proof was made to the satisfaction of the State Reclamation Engineer, of the beneficial use of .73
 acre feet per season, with a maximum rate of diversion of 0.02 cubic feet per second of the waters
 of ground water, tributary of _____,
 for the purpose of Domestic from January 1 to December 31;
 and for _____ from _____ to _____; and for
 _____ from _____ to _____; and that the use
 of said waters has been made in accordance with the laws of Idaho, and is hereby confirmed by the State Recla-
 mation Engineer and entered in the records of the Idaho Department of Reclamation: the point of diversion is
 located in Govt. Lot 3 (NW $\frac{1}{4}$ NE $\frac{1}{4}$) N, Sec. 10, T. 50 N, R. 5 W, B.M., and
 other additional points _____, in the County of
Kootenai; and that the amount of water to which such right is
 entitled and which is hereby confirmed, for the purposes aforesaid, is limited to an amount actually beneficially
 used for said purposes and shall not exceed .73 acre feet per year.

Description and location of place of use:

TWP.	RANGE	SEC.	NE $\frac{1}{4}$				NW $\frac{1}{4}$				SW $\frac{1}{4}$				SE $\frac{1}{4}$				TOTALS
			NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$	NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$	NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$	NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$	

Total number of acres irrigated _____

The right to the use of the water hereby confirmed is restricted to the lands or place of use herein described,
 as provided by the laws of Idaho.

Witness the seal and signature of the State Reclamation Engineer, affixed at Boise, Idaho, this

14th day of October, 19 69.

R. Keith Higgins
 State Reclamation Engineer

95-7003

Identification No. 95-7003

Permit No. 95-7003

STATE OF IDAHO
DEPARTMENT OF RECLAMATION

RECEIVED

DEC 15 1967

Department of Reclamation

PROOF OF APPLICATION OF WATER TO BENEFICIAL USE

1. a) Name of Permit Holder Charles B. White
b) Post Office Address W. 2826 Upton Ave., Spokane, Wash.
2. Permit Number 95-7003
3. Date of Priority that you are prepared to establish November 13, 1967
4. a) Source from which water was appropriated Underground drilled well government Lot 3
b) Location of the point of diversion: NE $\frac{1}{4}$ $\frac{1}{4}$, Section 10,
Township 50N, Range 5 W. B. M. Boise Meridian. Other points of
diversion: none

5. a) The amount of water and use to which the water has been applied:
amount 720,720 ^{gallon} for and drinking purposes from 3/1 to 9/30 incl.
(cfs and/or acre feet per annum) (Mo-Day) (Mo-Day)
amount 200,200 ^{gals} for Household purposes from 1/1 to 12/31 incl.
(cfs and/or acre feet per annum) (Mo-Day) (Mo-Day)
amount 100,000 ^{gals} for _____ purposes from _____ to _____ incl.
(cfs and/or acre feet per annum) (Mo-Day) (Mo-Day)

b) Total amount appropriated 1,001,000 ^{gals} cfs and/or acre feet per annum

c) Describe how and by whom measurement of rate of flow or amount of storage was made
and the qualifications of the person making the measurement: Maximum capacity
of pump - see attached spec - Times Time. Also
with assistance of Spokane City Water Engineer Dick Linder

6. If the means of diversion and conveyance are owned by someone other than the Permit Holder:

a) Give the name or description of the canal, ditch or other works by which the water is
conducted to the place of use: Does not apply

b) Describe the agreement or understanding by which you take water from the works: Does not apply

7. a) Briefly describe the works for diverting and conveying the water to the place of use,
(If from a subterranean source, give the pump size, motor size, size of well casing,
depth of well; if from surface water, give brief description of diversion structure and/or
canal or ditch) 1 H.P. pump, 1 1/4" suction & press.
jets size, 6" well casing, 38 ft deep well
17 ft to top of water level. 20 gallon
storage tank.

E.A. Holman Whisling Co. 95-7003

Only our single-stage "30" Jet Pump has all the features that combine to give you constant city-main dependability

✓ Reserve Pressure

Holds pressure at 30 to 50 lbs., 50% more than industry standards

✓ Reserve Power

Capacitor motors produce almost twice their rated HP

✓ Emergency Drive

Connects to any gasoline motor, even a lawn mower, if power fails

✓ 3-position Switch

OFF... AUTOMATIC, for everyday use... ON, for maximum pressure

1/2-HP Pump with out jet or tank **\$79.95** cash **\$8 monthly**

Provides tremendous volume from shallow wells, yet available in a size that can pull from wells to 110 feet

Our best single-stage jet pump. Mounts to tank in seconds with special quick-connect flange. Just loosen four bolts to remove motor for servicing—no need to tear down the entire pump. Jets sold separately below. For easier, longer-lasting installation, use flexible plastic pipe (see page 1197).

3/4-HP model is for shallow wells only (to 22 ft.), 110-120-v., 60-c. AC. 1/2, 3/4 and 1-HP models are for 110-120 or 220-240-v., 60-c. AC. Tanks referred to in chart are our glass-lined models (see page 1177). For best performance, order pump and one of our non-sweat insulated tanks (see page 1177).

95-7003

Sears Submersible "40" Pumps. tested 5 ways to assure perfect operation at depths to 450-feet

Convenient, compact control box provides simple, remote operation of your pump from the location you prefer

All this is tested for you:

- The hydraulic performance
- Complete motor waterproofing
- Vibration-free operation
- Full-power motor smoothness
- Completely accurate dimensions

1/2 HP \$179⁹⁵ cash \$6.50 monthly

1 Sears low prices for submersible pumps include all this: automatic overload protector, air volume control, pilot light, built-in check valve, precision cast impellers, control box that houses condensers, pressure gauge and reset button... even a special hook devised to guard against dropping pump during installation. Delivers big 40-60 lbs. high pressure. High-power capacitor motors produce almost twice their actual rated horsepower. Completely automatic... preset switch turns pump on at 40 lbs. pressure, off at 60 lbs. No power waste in overcoming friction because water is whirled up by centrifugal force. Motor completely sealed against moisture... noiseless, too.

For 4-in. or larger wells. Installation is simple... needs just one run of 1-in., 125-lb. test flexible plastic pipe (for depths

Chart shows gallons-per-hour at 40-pound pressure... not listed unless pump can produce 60 pounds at that depth.

Depth in feet	20	40	60	80	100	120	140	160	180	200	220	240	260	280	300	320	360	400	450
3/4 HP model	735	690	645	595	545														
1 HP model	830	790	765	725	685	655	620	570	525										
1 1/2 HP model	865	840	825	790	775	745	730	705	665	650	610	580	560	515	475				
2 HP model	890	870	860	835	820	805	790	775	760	735	725	715	695	675	655	635	580	535	440

You can increase depth by resetting pump pressure.

6-year Submersible Pump Guarantee for residential water systems. FREE replacement if pump fails during the first year... we pay installation. Pay 25% of current price for second year, 35% for third, 45% for fourth, 55% for fifth, 65% for sixth. Installation after 1st year is extra, if desired. Does not cover abrasive water damage to pump.

2 Well Seal. For submersible pumps. Use at top of well. Includes torque snubber and safety ring. Helps keep the water in your well cleaner, freer of harmful impurities. 1-inch drop pipe opening.

For submersible pumps (1) and (5).

42 G 23591—For 4-in. casings. Wt. 5 lbs. \$4.89
42 G 23592—For 5-in. casings. Wt. 6 lbs. 8 oz. 5.79
42 G 23593—For 6-in. casings. Wt. 12 lbs. 6.98

For (4) at right. 1 1/2-inch drop pipe opening.

42 G 23605—For 5-in. casings. Wt. 6 lbs. 8 oz. \$5.79
42 G 23607—For 6-in. casings. Wt. 12 lbs. 6.98

3 Three-wire Connecting Cable. Specially engineered to withstand many years of underwater use. Has a tough, high-quality neoprene rubber outer coating that's impervious to rust and corrosion.

To simplify installation, all Sears cable comes complete with a connecting kit. This kit includes three waterproof connectors which will enable you to make splices that are completely leakproof.

Use with all submersibles listed on this page. Must be used when making the electrical connection between pump and control box. Chart below shows maximum lengths with which each size of cable may be used with the different size submersible pumps.
No. 12 Cable. Shipping weight per foot 3 ounces.

	230	Single	110 ft.	175 ft.	280 ft.
3	220	3-phase	295 ft.	469 ft.	746 ft.

*Combined length of cable and above-ground wire.

When choosing a pump, be sure to select one that will meet your requirements from your well depth, water level in well and well-casing diameter. Use a shallow-well pump for wells to 22 feet, a deep-well model for deeper wells. While 20 to 40 lbs. pressure is adequate, 30 to 50 or 40 to 60 lbs. is best for home use. For help in choosing a pump, write Sears; order FREE estimate 39 G 6558.

SHIPPING NOTE: "N" items (as 42 G 2832N2) are sent by freight (rail or truck) or by express.

to 150 feet), and simple electrical connection—between pump and control box. Use strong synthetic rope to connect pump safety collar to well seal. 1-inch rigid or galvanized pipe may be used for wells over 150 feet deep (see index).

Order cable and well seal below (seal includes torque snubber to prevent pump twisting). Check table below for well depth and capacity you need. For 60-c. AC. Not for use in sandy wells. Be sure to see tanks on page 1177.

42 G 2832N2—1/2 HP. 110-120-volt. Wt. 68 lbs. \$179.95
42 G 2833N2—1/2 HP. 220-240-volt. Wt. 68 lbs. 179.95

Dear Sir:

In regards your form letter #8 to undersigned for Permit # 95-7003, I can be available to be on premises at Post Falls if I know when inspector will be there.

Well pit is underground & covered by manhole cover in southwest corner of property. Right now under about 1 1/2' of snow. For inspectors guidance, property is located at Post Falls, south side of the river, directly north of Erv. McEldowney's home, or due East of Hugh's greenhouse, or 3rd place south & East of Fendry's home which is directly across street from Post Falls Park.

If you wish me to be there, & I'd like to be, please call me at my Spokane office 788-7571 in 95-7003

the mornings only or send a letter to
my home at W. 2826 Upton Ave,
Spokane Wash, advising me of time & date.

Best personal regards

Charles B. White

W. 2826 Upton Ave
Spokane, Wash

P. S. Either Mr M^r Kittick or
Mr Hughes have access to my
place & could assist inspector
also if this would work out better
for your people.

Re: Permit No. 95-7003

Mr. Charles B. White
W. 2826 Upton Ave.
Spokane, Washington

Dear Mr. White:

A representative from this department made an examination of your works covered by permit 95-7003. The works were found capable of producing 0.03 c.f.s. of which 0.02 c.f.s. can be recognized as beneficially used and licensed under Idaho law. The water is used for domestic use.

If you disagree with the findings, please advise within 10 days. Otherwise a license will be issued showing the findings as set forth in this letter.

Very truly yours,

Dean R. Reynolds
Field Examiner

Dear Mr. White:

We acknowledge receipt of your affidavit submitted as proof of beneficial use on application for permit 95-7003.

Before a license can be issued a field examination must be made by a representative from this department.

We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system. If someone other than you should be contacted by the examiner, please advise.

Very truly yours,

Re: Permit No. 95-7003

Charles B. White
W. 2826 Upton Avenue
Spokane, Washington

Dear Mr. White:

One of the conditions of the approval of your permit 95-7003 was that proof of application of the water to beneficial use be submitted to this office on or before February 1, 19 68.

Enclosed is an affidavit form which must be used to submit this proof. You may also request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, ICA.

Either the proof or a request for extension must be received by this department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

State Reclamation Engineer

Spokane, Washington 99205

Dear Mr. White:

In reviewing the Laws of the State of Idaho, we find that an affidavit which is used to submit proof of beneficial use on a permit may be notarized anywhere. It does not have to be done in Idaho.

Enclosed you will find the affidavit to be used to submit this proof. Please follow the instructions carefully and insert only accurate information as the affidavit will limit the permit in question.

Please contact us if we may be of further assistance.

Re: Application for Permit

Charles B. White
West 2826 Upton Avenue
Spokane, Washington

Dear Mr. White:

We are returning your application for permit to appropriate the public waters of the State of Idaho and your personal check in the amount of \$20.00.

The application requires some clarification prior to its acceptance. Under Question 3 of the application, you have failed to list the public land survey subdivision in which your diversion is located. This is a requirement under the Idaho Statutes. The subdivision must be identified by a least a 40 acre description.

Under Item 4, quantity of water to be appropriated, you request 1.0 cubic foot per second. You should be advised that the maximum rate of diversion that the department allows for domestic use is .02 cubic feet per second only. This equals 13,000 gallons a day. Therefore, if you would change your application to request only .02 cubic feet per second of the waters of a subterranean source to be appropriated, the filing fee would then be \$10.00.

Also under Item 7a, you have listed that you require 1 month to prove completion of works and beneficial use. The general policy of the department allows a minimum of 1 year for required proof. If your permit is approved, it would be for a 1 year period.

The map required under Section 11 of the application must show the public lands survey legal description of the subdivision, section, township, and range of the point of diversion and place of use. Please enter the required information on your map.

Please contact us if we may be of further assistance.

Very truly yours,

Donald W. McEldowney 95-7003
