Re: Permit No. G-32105

Mr. James W. Ingalls
Attorney at Law
Coeur d' Alene, Idaho 83814

Dear Mr. Ingalls:

In reference to your January 15, 1969 correspondence, we have discussed the matter at great lengths with the State Reclamation Engineer and find that, under existing statutes and Department policy, the Department will not approve amendments which tend to expand the beneficial use of the permit.

The rate of diversion of a well is not the only factor involved in an expansion, it is the additional water requirements of the acres involved for crop production during the calendar year. Therefore, it is recommended that the permit holder file a new application for permit to cover the land in question. The same point of diversion and source of water as under the original permit could be used.

We have prepared an application for your use in consideration in this matter. If you propose to file a new application, please fill in the additional information and submit the application for permit with the filing fee as indicated in the instructions we are enclosing.

If we can be of further assistance, please advise.

Very truly yours,

Donald W. McEldowney
Appropriation Examiner

Dear Sirs:

GEORGE E. CARLSON, Permit #G32105

Mr. Carlson has acquired additional land adjacent to the land to be irrigated under Permit #G32105, which additional land is described as:

North 1177 feet of NW-NW less right of way,
South 517 feet of North 1177 feet of West
366 feet of NE-NW, Section 35, Township 51,
Range 5, W.B.M., Kootenai County, Idaho,

which consists of 38 to 40 acres.

Mr. Carlson does not intend to install any additional works and will irrigate the same from the existing well, pump and sprinkler system.

Would it be possible to amend the permit to permit water to be used upon the aforementioned land as well as the land referred to in the permit, since no additional amount of water will be asked and as the works will be the same and the existing permit is for the total capacity of the pump?

I would appreciate your advice and if you would forward to me appropriate forms for making the amendment or an application which would fit the purpose.

Respectfully,

James W. Ingalls

Dear Mr. Carlson:

Please find enclosed a copy of the map submitted with your application for permit. This is a copy of one of two maps submitted with your application for permit. When the application was approved, you will note on your copy a stamp of approval and a number was applied along with the date of approval on both copies. One of the maps was retained in our file and the other copy was returned with your permit.

Please note from the map that the land description shows it to be in the S $\frac{1}{2}$ SW $\frac{1}{4}$, Sec. 35, Twp. 51 N., Rge. 5 W.B.M. The well being located with a dot in the approximate center of the land, but claiming to be in the SW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 35. Our record book shows and reads the same as the above description, because it was copied from the application which was approved as a permit.

It will be necessary for you to amend both the point of diversion and land list, readvertise and take new depositions. You can use the same people as before if you like. Since it is required to have new depositions, the priority will have to be advanced as much time as they are late, the new depositions being considered as the only one taken because the first being entirely incorrect.

We are sorry this happened this way.

The necessary forms are enclosed. There is a fee of \$2.00 which should accompany the forms.
