Attn: Manuel Schneidmiller

Dear Mr. Schneidmiller:

During our previous conversations concerning the above numbered permit, it was determined that the water license is in error and that the error was due to an amendment interpretation made by the Department of Reclamation. We, at that time, agreed to amend, without additional cost, the permit clarifying the place of use and the point of diversion. At the time of our conversation, a question arose concerning the actual location of the point of diversion. The permit showed the point of diversion as the center of the NW $\frac{1}{4}$ Sec. 26, but we assume that the point of diversion is in the SW $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 26. You were to advise us as to the actual location. To date, we have not received any indication as to the actual location. Would you please look into this matter and contact us so that we may continue with the processing of this license. Your assistance will be appreciated.

Dear Sir:

Please find enclosed the Proof of Application for permit No. G-30389, which have been completed.

Please note the discharge of the pump is 2200 gallons per minute. This would be near 5 cu. ft. per second, but the form shows 3.34. This is the figure shown on the original permit, but if you will check your records, you will find that additional land was added to the permit, which required more water from the well, and a larger pump was installed.

As a result of this additional land being added, the priority date was advanced on this permit to May 31, 1966. The original pump was a 150 h/p, but the present one is a 250.

Dear Mr. Schneidmiller:

Returned herewith is your application to amend the land list of Permit No. G-30389. It is noted you have not included the required \$.50 recording fee. In addition, prior to approval or rejection of your application for amendment, we will require you to submit a plat of your lands under this permit, tying your lands into legal subdivisions, sections, townships and ranges.

Also, please be advised that it is the policy of this department to advance the priority of any permit which, when amended, is expanded beyond the original limits of the permit. Therefore, your addition of 120 acres would advance the priority of Permit No. G-30389 to the date the amendment is approved. Upon approval of the amendment, you would be allowed an addition of 2.40 c.f.s. to the original quantity of water applied for under this permit.

Please contact us if we can be of further assistance.
