Dear Mr. McFarland:

The date for proofs of Completion of Works and Application of Water to Beneficial Use, as set out under the terms of Permit No. G- 26338 are due not later than **May 18, 1961.**

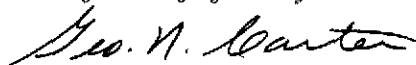

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list which has been recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least forty (40) days before the mentioned date, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used; the point of, or points of diversion; and the location of use of the lands which are irrigated -- all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with Form 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named and before the notary public, as advertised in the publication notice.

Very truly yours,

Dear Mr. McFarland:

Regarding your July 1, 1958, letter, this is to advise you that Permit No. G-26338, William T. Hoffman, was approved May 18, 1956, and time for proofs, a maximum of five years, is May 18, 1961. Since we have an extra copy of the permit on file, for your convenience we have enclosed it. Also enclosed are Forms 36, in duplicate, and 11 together with preliminary instructions for making proofs. Proofs under this permit may be made at any time but unless Mr. Hoffman has his well completed and diversion works completed to irrigate the 160 acres to which this water will be appurtenant, it would be wise for him to take advantage of the time allowed for proofs.
