Dear Mr. Holland:

I will attempt to answer the questions raised by your letter of February 7, 1971, in the same order they were asked.

At the present time, I can see no reasons why you could not make application to this department for a permit to divert water from your existing well or for any new wells, if you have a definite project to beneficially use the water. The date of priority of any new groundwater filing is the date it is received by this Department. Because you do not have a water right filing on your irrigation well and because you haven't applied the water to beneficial use, any water right initiated now would have a priority of the date your application is received and therefore would be junior in priority to that of Mr. Hitchcock.

You also asked what effect the 2.0 cubic feet per second of water appropriated by Mr. Hitchcock would have on your future development needs. Of course, any water taken from a source would deplete the source by that amount and leave that much less for future development. In your particular case, the aquifer which supplies your wells is coarse valley-fill material, composed of sand and gravel which is one of the best types of aquifer, therefore, the effect on your well may be negligible.

The waters of the State of Idaho must be beneficially used to develop a water right, and in fact, an application filed for the purpose of reserving water for future use is considered speculative in nature and must be denied.

February 17, 1971

Your present License No. 95-2087 (21601) for the diversion of 2.68 cubic feet per second of water from the Spokane River for the irrigation of 232 acres appears to meet your present needs. But, if your needs increase, you should submit an Application for Permit to appropriate the public waters of the State of Idaho before diverting from your well.

If you have further questions concerning this matter, please contact us.

Dear Mr. Higginson:

Am corresponding in ref. to the enclosed legal notice appearing in last weeks Coeur d'Alene Press. This correspondence is not in the form of a protest but merely to seek some answers to questions I have in regards to this application.

I have property adjoining Mr. Nitchcocks property. This property has 2 wells, one which is being used for our domestic use and the other was drilled for irrigation purposes however was never used. (The west boundary of both of these properties is the Wn & Ida. state line) The reason ^{our second well} ~~this~~ water was never used was because another property we own is on the Spokane River and joins this property and we have a water right from the river for irrigation.

At this time the property in this area is becoming extremely popular for sub-dividing and

95 2087

mobile home use and my concern is for the future.

Will it be possible for me to develop the unused well for water for housing, sub division or mobile home use. Or will I be able to drill any new wells on this property should there be need for it in the future. Would his application for 2.0 cu. ft. per sec. have any bearing on any future needs or amounts of water which I may seek application for in the future.

Both wells that I have on this property have been drilled for over 25 yrs.

I am the 3rd generation on this property - it has been in the family for approx. 68 yrs. and I would be in a rather peculiar situation if I would not be able to get water in the future.

Would appreciate the answers to the above questions and any suggestions you may have for safeguarding any future needs.

Thanking you in advance,

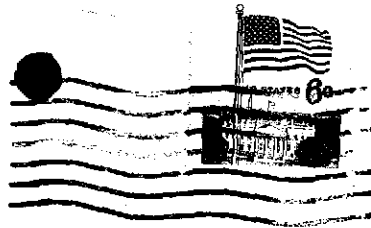

Respectfully Yours

Dear Mr. Holland:

Thank you for your note of March 7, 1969. Please be advised that we have no way to change the recorded name of the water license holder. Inasmuch as the water license constitutes some form of real property, the water license is vested in the property described within the water license and the water license and the water right transfer with the deed of sale of the property to the owner.

It is quite a detailed process for the Department to consider changing the names on licensed rights as we do not have the authority to make it mandatory to keep the change of ownerships current.

The Department will file your letter with the water right file and it shall be made obvious that there has been some sort of a change. We are enclosing a copy of the water license for your use. If we may be of further assistance, please contact us.

Dear Mr. Holland:

Receipt is acknowledged for your check in the amount of \$20.00 to cover the issuance of water license for the above numbered permit.

It is not possible to issue two licenses for this permit; however it is possible to assign part of the license in a contract of sale. All you do is assign 1/3 of your 2.68 c.f.s. of water and lands to the new owner. A licensed right is like decreed water and can be shown on the deed when sold referencing the license number and page number.

We are enclosing your License No. 21601 and receipt No. 33188.

RE: Permit No. 21601Date May 1, 1961J. O. Holland & G. E. Holland

J. O. Holland
Post Falls, Idaho

Dear Sir:

The date for proof of application of water to beneficial use, as set out under the terms of Permit No. 21601 is due not later than July 19, 1961. If by this date you are not prepared to make this proof, you may make it at a later date, however, your priority will be advanced the same length of time for which the proof is late.

Before this proof can be made, the statutory requirement is that a Notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county.

We enclose Form 10, in duplicate, which is to be filled in and returned to this department at least forty (40) days before the above mentioned date or before the time you intend to make proof. This form, in duplicate, is to include the time of day, the date (allowing for four weeks publication), the name of the town, the address of the Notary Public before whom you will appear to make the depositions of proof (this may be at any place that is convenient for you and your two witnesses), the quantity of water, ~~for~~ what purpose it is used, the point or points of diversion and the location of use or lands which are irrigated--by 40-acre legal land description. Descriptions should be taken from your Permit, including any amendments thereto, as recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your Notice is published.

Also enclosed is Form 11, which is the authorization for us to have the Notice published in the designated county newspaper, at your expense. This is to be returned with Forms 10.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set and at the place named, before the Notary Public, as advertised in the publication notice.

We return your affidavit offered in proof of completion of works on Permit No. 21601 for the following corrections:

1. Question 3 should give the location of the point of diversion to a legal subdivision, Section, Township and Range.

2. Question 6 I. should describe the works that have been completed which your Permit gives as a pump, pipe line and sprinkler system.

3. Question 8 should give the legal description of the land to which the water is appurtenant.

Please make these corrections and return the affidavit promptly.

Meanwhile, we hold to your credit your check for the \$5.00 fee in connection with this proof.

Very truly yours,

RE: Permit No. 21601

INSTRUCTIONS

PROOF OF COMPLETION OF WORKS

Messrs. J. O. & G. E. Holland
Spokane Bridge
Washington

Boise, Idaho

Dear Sirs:

Under the terms of your permit No. 21601 you are required to complete your diversion works on or before July 19, 1955. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

MARK R. KULP
