Dear Mr. Cranston:

We are now in receipt of the affidavit of publication in the Kootenai County Leader which completes proof of beneficial use under Permit No. 20810 of the Units Water Association.

Before final action is taken in the matter, the law requires that an examination be made by an engineer from this department.

We cannot say just when this examination will be made as this department has but one field engineer who makes examinations all over the State.

However, he will try to contact you or some member of the association at the time the examination is made so that arrangements may be made to show him over the project.

Re: Permit No. 20810

Mr. William R. Cranston, Secretary
Units Water Association
Route 1
Post Falls, Idaho

Dear Mr. Cranston:

In reply to your letter of March 17, 1951, inquiring as to the procedure to prove up on your well in Permit No. 20810:

Proof of Completion of Works may be made by executing Form 6 enclosed, before a Notary Public, and returning to this Department with the statutory fee of \$5.00.

Proof of Beneficial Use requires publication once a week for four consecutive weeks in a county newspaper prior to making the proof. Notice should be made in duplicate on Form 10 enclosed, setting the time and place and naming the Notary Public before whom the proof is to be made. The time, of course, should be set sufficiently far ahead to allow for the four weeks publication and the proof may be made at any place convenient for you and your two witnesses.

Both copies of Form 10 are to be returned to this Department together with Form 11 which is your authorization for us to have the notice published at your expense in the designated county newspaper.

We shall then send a copy of the notice to the newspaper with instructions in regard to publishing.

Very truly yours,

Dear Mr. Iddings:

We return herewith Permit No. 20810, of the
Units Water Association and have corrected the date on
which work is to begin, to show the statutory limit of
60 days, or until February 18, 1949. It was, of course,
a typographical mistake giving the date as February 18,
1948.

Paragraph 7, Section 41-204, Idaho Code An-
notated provides that construction must commence with-
in 60 days from the date the Permit is issued, and this
Department has no authority to extend the time beyond
that limit.

However, we assume that certain preliminary
work has been done within the prescribed time, although
no proof of such work is required by this Department.
