CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right limited to the amount that can actually be beneficially use used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Return flow if discharged to a surface water system shall meet Idaho Water Quality Standards.
6. The water right confirmed in this license for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this license and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this license.
7. This right when combined with all other rights shall provide no more than .03 cfs per acre nor more than 3.0 afa per acre for the lands above.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 28TH day of JANUARY, 1993.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 94-7263, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before

September 1, 1988.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. Other:

Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.
The permit holder shall either install a measuring device or an access port or provide a certified measurement or computation of flow based upon system design to be prepared by a professional engineer.
This permit is subject to the provisions of Sections 42-205 through 42-210, Idaho Code, restricting the sale, transfer, assignment, or mortgage of this permit. Failure to comply with these provisions is cause for immediate cancellation of this permit.
Use of water under this permit for the purpose of power generation is subordinated to future diversion of water either upstream or downstream for irrigation or other consumptive beneficial uses.
This permit does not constitute Idaho Public Utilities Commission or Federal Energy Regulatory Commission approval that may be required. Water used under this permit if discharged into a natural channel shall meet Idaho Water Quality Standards.

Witness my hand this 7th day of September, 1983.

Re: Examination Permit # 94-07263

Dear Mr. and Mrs. Dotson:

Below are my measurements and calculations of your water system, which will represent my recommendations for licensing.

POWER CALCULATIONS

Measurement of flow over 90 deg. V-Notch Weir is 14 1/4" 1.19 ft. $Q=2.49H^{2.48}$
Therefore $2.49(1.19)^{2.48} = 3.83\text{cfs}$

for a check:

$Q=(kw)(11.2)/(\text{psi})(\text{efficiency}) \dots Q=(12)(11.2)/(45)(80\%)=3.9 \text{ cfs}$

IRRIGATION CALCULATIONS

Pump Efficiency:

$Q = \frac{(8.8)(1.5\text{HP})80\% \text{ eff.}}{(2.3)(35 \text{ psi})+140} = 0.048 \text{ cfs or } 0.05 \text{ cfs.}$
(as pressure goes up quantity of flow goes down)

Five Nelson sprinklers with 5/32" nozzles at 35 psi = .046 cfs or 0.05 cfs

MINING CALCULATIONS

Mannings formula: $Q = \frac{2.667}{(0.463/\text{pipe resistance})(\text{diameter of pipe})^{.5}} (\text{head/length of pipe})^{.5}$

$Q = \frac{2.667}{(0.463/.009)(8/12)^{.5}} (60/800)^{.5} = .058 \text{ cfs or } 0.06 \text{ cfs}$

Domestic is assumed at 0.04 cfs.

I received a letter from you in late July 88, you want us to install a Water Port on a Weir, we have a Weir in place for over a year now, at 60 degree,

Could we get a Date in the spring so you can measure at full Capacity and get all this behind us.

Thank you

Re: Permit # 94-07263

Dear Permitholder:

There seems to be some failure in communications, my understanding was that when you had installed the measuring port you would contact me to come out to the site and make the measurements of your water diversion. Since these measurements will establish the amount of water that will be licensed for irrigation and for power purposes, the entire system must be running at it fullest capacity.

If you have installed either the measureing port or the weir we discussed, then please contact me as soon as possible to schedule an appointment for me to complete the examination and license the water you are using.

I regret to inform you that the construction of a storage pond cannot be considered as part of the above-referenced permit, since it would increase your annual water use.

Gentlemen:

I wish to withdraw the Beneficial Use Statement which I filed for the above-referenced Permit on February 22, 1985.

I understand that I still have until September 1, 1988 to have the project completed.

If you have any questions, please contact me.

Sincerely,

Mrs. Lois G. Dotson

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing

MICROFILMED

of certified water right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department offices.

RE: Permit No. 94-7263

Dear Permit Holder:

We acknowledge receipt of your statement submitted as proof of beneficial use for the above referenced permit.

Before a Water Right License can be issued, a field examination must be made by a representative of this department.

A condition of approval of your original permit required the installation of an access port which, according to the proof card submitted by you, has not been installed. An access port must be installed prior to the time a field examination is made.

A field examiner will contact you to arrange to examine your system.

If you have any questions regarding the field examination, please contact this office by phone at 765-4639 or in person at our office.

Sincerely,

/s/

Dear Permit Holder:

Enclosed is a copy of your approved Application for Permit. We direct your attention to the conditions of approval on the fourth page.

Be sure to note the special condition requiring you to install a measuring device, or an access port, or to provide a certified measurement or computation of flow based upon the design of the system to be prepared by a professional engineer.

The 1982 Idaho Legislature added a requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed instructions entitled "Making Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

DAVID R. TUTHILL, JR., P.E.
Supervisor, Water Allocation Section
