EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing

of certified water right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department offices.

RE: Permit No. 94-7226

Dear Permit Holder:

We acknowledge receipt of your statement submitted as proof of beneficial use for the above referenced permit.

Before a Water Right License can be issued, a field examination must be made by a representative of this department.

A field examiner will contact you to arrange to examine your system.

If you have any questions regarding the field examination, please contact this office by phone at 667-6484 or in person at our office.

Sincerely,

/s/

RE: Permit No. 94-7226

Dear Mr. Bissell:

I am in receipt of your letter dated November 1, 1982, in which you raise a question regarding the requirements for commencement of works for the above-referenced permit.

The fact that you have purchased a portable pump and sprinkler system serves as sufficient progress toward completing your water right, so you are qualified to check the upper block on the blue commencement of works postcard and submit it to this office.

If, on the other hand, development of the water delivery system described on your permit is fully completed, then you are entitled to submit the white statement of Beneficial Use postcard, enclosed. This action will trigger a field examination of your system by a representative of the Department.

Regarding interruption of your water use by a neighbor, the protection afforded by your water right is extremely situation-specific. The hydraulic nature of the spring that feeds the pond and the type of interruption are so multi-faceted that I could not venture a guess regarding the extent of your protection. It is safe to say, however, that you are in a much stronger position for protection by having a valid water right.

If you have any further questions regarding this right, please feel free to contact me.

Sincerely,

DAVID R. TUTHILL, JR.

Dear Sir:

We just received your paperwork regarding our request for a water right, permit # 94-7226.

Your correspondence refers to "Commencement of Work." This is a natural pond -- not manmade. The pond is on my property. My usage consists of setting up a portable gas engine drive pump (no electricity is available) and connecting 40 foot lengths of sprinkler system pipe to it to water a 7-acre field adjacent to the pond. I have been doing this since purchasing the property. I plan no additional construction other than periodically cleaning of the pond.

Under these circumstances, please explain how I "...commence the excavation or construction of diverting works..." to complete this project when there is no further requirement for it?

The personnel in the local office where I registered this water right were vague when I explained my basic intent was to preserve my pond, and my usage of water therefrom, from the possibility of some future, adjacent building which, through the course of excation and development, could interrupt the water flow. You see, our concern is that the property boundry is but 10 feet from the edge of the pond.

While there are no pending or immediate plans for any such adjacent building or excavation, we felt it was in the best interest to legally establish the existance of the pond on our property so that we would not have some possible problems 10 or 15 years from now.

Your comments would be appreciated.

Sincerely,

Angelo B. Bissell
