RE: RECOMMENDATIONS FOR LICENSING

DATE: 2 FEB 1988

During the review of the field exam it was found that the place of use described for irrigation did not include the NWNE quarter. The examiner however found that one acre was irrigated but did not recommend that an amendment of permit be required.

The reason for this recommendation was because the quarter was described as the location for the stockwater use.

Due to the fact that the quarter was in fact identified on the permit even though not included as part of the irrigation use, I concur that no amendment should be required.
