Dear Mr. Park:

Enclosed is a copy of the above referenced license.

This license is a permanent water right and does not need to be assigned. A license is appurtenant to the ground it covers, therefore, whoever owns the land owns the water right.

We will, however, put your letter in the file and a copy of any further correspondence will be forwarded to Mrs. Vanderpoel.

Dear Mr. Vanderpoel:

We are in receipt of your correspondence of March 2, 1968 on the above referenced permit. Before we can continue processing your notice of intent to make proof of beneficial use under this permit, we will require that you amend the points of diversion covered by the permit to the points indicated in your map submitted March 1968.

It is also noted that you have proposed an increase in acreage covered by this permit. You may rearrange your 35 acres; however, any increase in acreage must be covered by a new permit. If this is additional acreage, you may use the enclosed application form to apply for an application.

Enclosed you will find an application for amendment form which has been partially completed. If you agree with the proposed amendment, please sign it and return it with the required \$5.00 amendment fee. We will then continue processing your advertisement.

Re: Permit No. 24335

C. C. Vanderpoel
St. Maries,
Idaho

Dear Mr. Vanderpoel:

We are in receipt of your letter of January 30, 1968 on the above referenced permit. Please be advised that if you wish to obtain a water license under Permit No. 24335, you would be required to file proof of beneficial use of the water as indicated under your original permit.

The proof indicated is advertising of your notice of your intent to make proof for four consecutive weeks in a county newspaper in which the point of diversion is located.

The notice shall contain the name and address of a notary public and a date on which you, as permit holder, must appear before this specific notary public with two disinterested witnesses and fill out depositions asserting to the beneficial use of the water under this permit.

You would then return the depositions to the department along with an affidavit of publication from the newspaper. Upon receipt of this information, the department would proceed with a field examination of the land irrigated under this system and the measurement of the system. Upon completion of this, you would be required to pay a licensing fee and a license would be issued.

At this point, you should be aware that under the Idaho Statutes which cover appropriation, the priority of July 30, 1953 which you are trying to establish under this permit for the diversion of the waters of Santa Creek, tributary of St. Maries River, would be reduced the exact number of days that your proof of beneficial use of the water is late. Proof of beneficial use of the water under your permit was due no later than August 7, 1957. Therefore, by submitting proof at this time, you would stand a loss of priority of many years.

There exists two possibilities for you to record your water right in addition to proving uponn your permit. One would be to file a claim to a water right, recording the evidence of your water right in a claim for with the Department of Reclamation. For your use in considering this matter, we are enclosing a current set of claim forms and instructions for filing. Please note that the claim which you would be filing would baly evidence of a water right and not a water right as such. The advantage of using a claim form in your case would be that you would be able to claim the first use of of the water without a loss of priority.

The second option which we noted would be to relinquish Permit No. 24335 and file a claim to a water right. The two options are

In the case of the first option, you should be advised that Permit No. 24335 will be held for cancellation in the near future unless the proof of beneficial use is submitted. The options are yours.

Dear Sir:

In regard to my irrigation permit No. 24335 issued on Aug. 7, 1953 I would like to know what steps I should take to complete establishing rights on the water covered by this permit.

I have used the water every summer since 1953 for sprinkler irrigation. At the time I first applied I was using it on 2W. $\frac{1}{4}$ A.

sec. 18 T. 44 N. R. 1 West as well as on the S.E. $\frac{1}{4}$ that the permit covers. at that time I didn't own the S.W. $\frac{1}{4}$ but since have acquired it.

I have one electric outlet on each quarter and move my motor and pipe back and forth so am never watering on both pieces of property at the same time.

Please advise me what action I have to take to complete this.

Dear Sir:-

Under the terms of your permit No. 24335 you are required to complete your diversion works on or before August 7, 1955. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

MARK R. KULP

RE: Permit 24335

Mr. C. C. Vanderpoel
St. Maries
Idaho

Dear Mr. Vanderpoel:

We enclose Permit No. 24335 and direct your attention to the limitations and conditions as given on the forth page under Approval of the State Reclamation Engineer.

You will note that this has been approved for seven-tenths (0.7) cubic foot per second or thirty five (35) inches instead of the two (2) second feet applied for as one (1) inch per acre is the maximum allowed by statute for irrigation purposes.

We also enclose Departmental Receipt No. 26095 for the \$5.00 filing fee which is the correct amount for seven-tenths (0.7) of a second foot; as your check was for \$5.25 there is a refund of 25 cents due you which we enclose herewith.

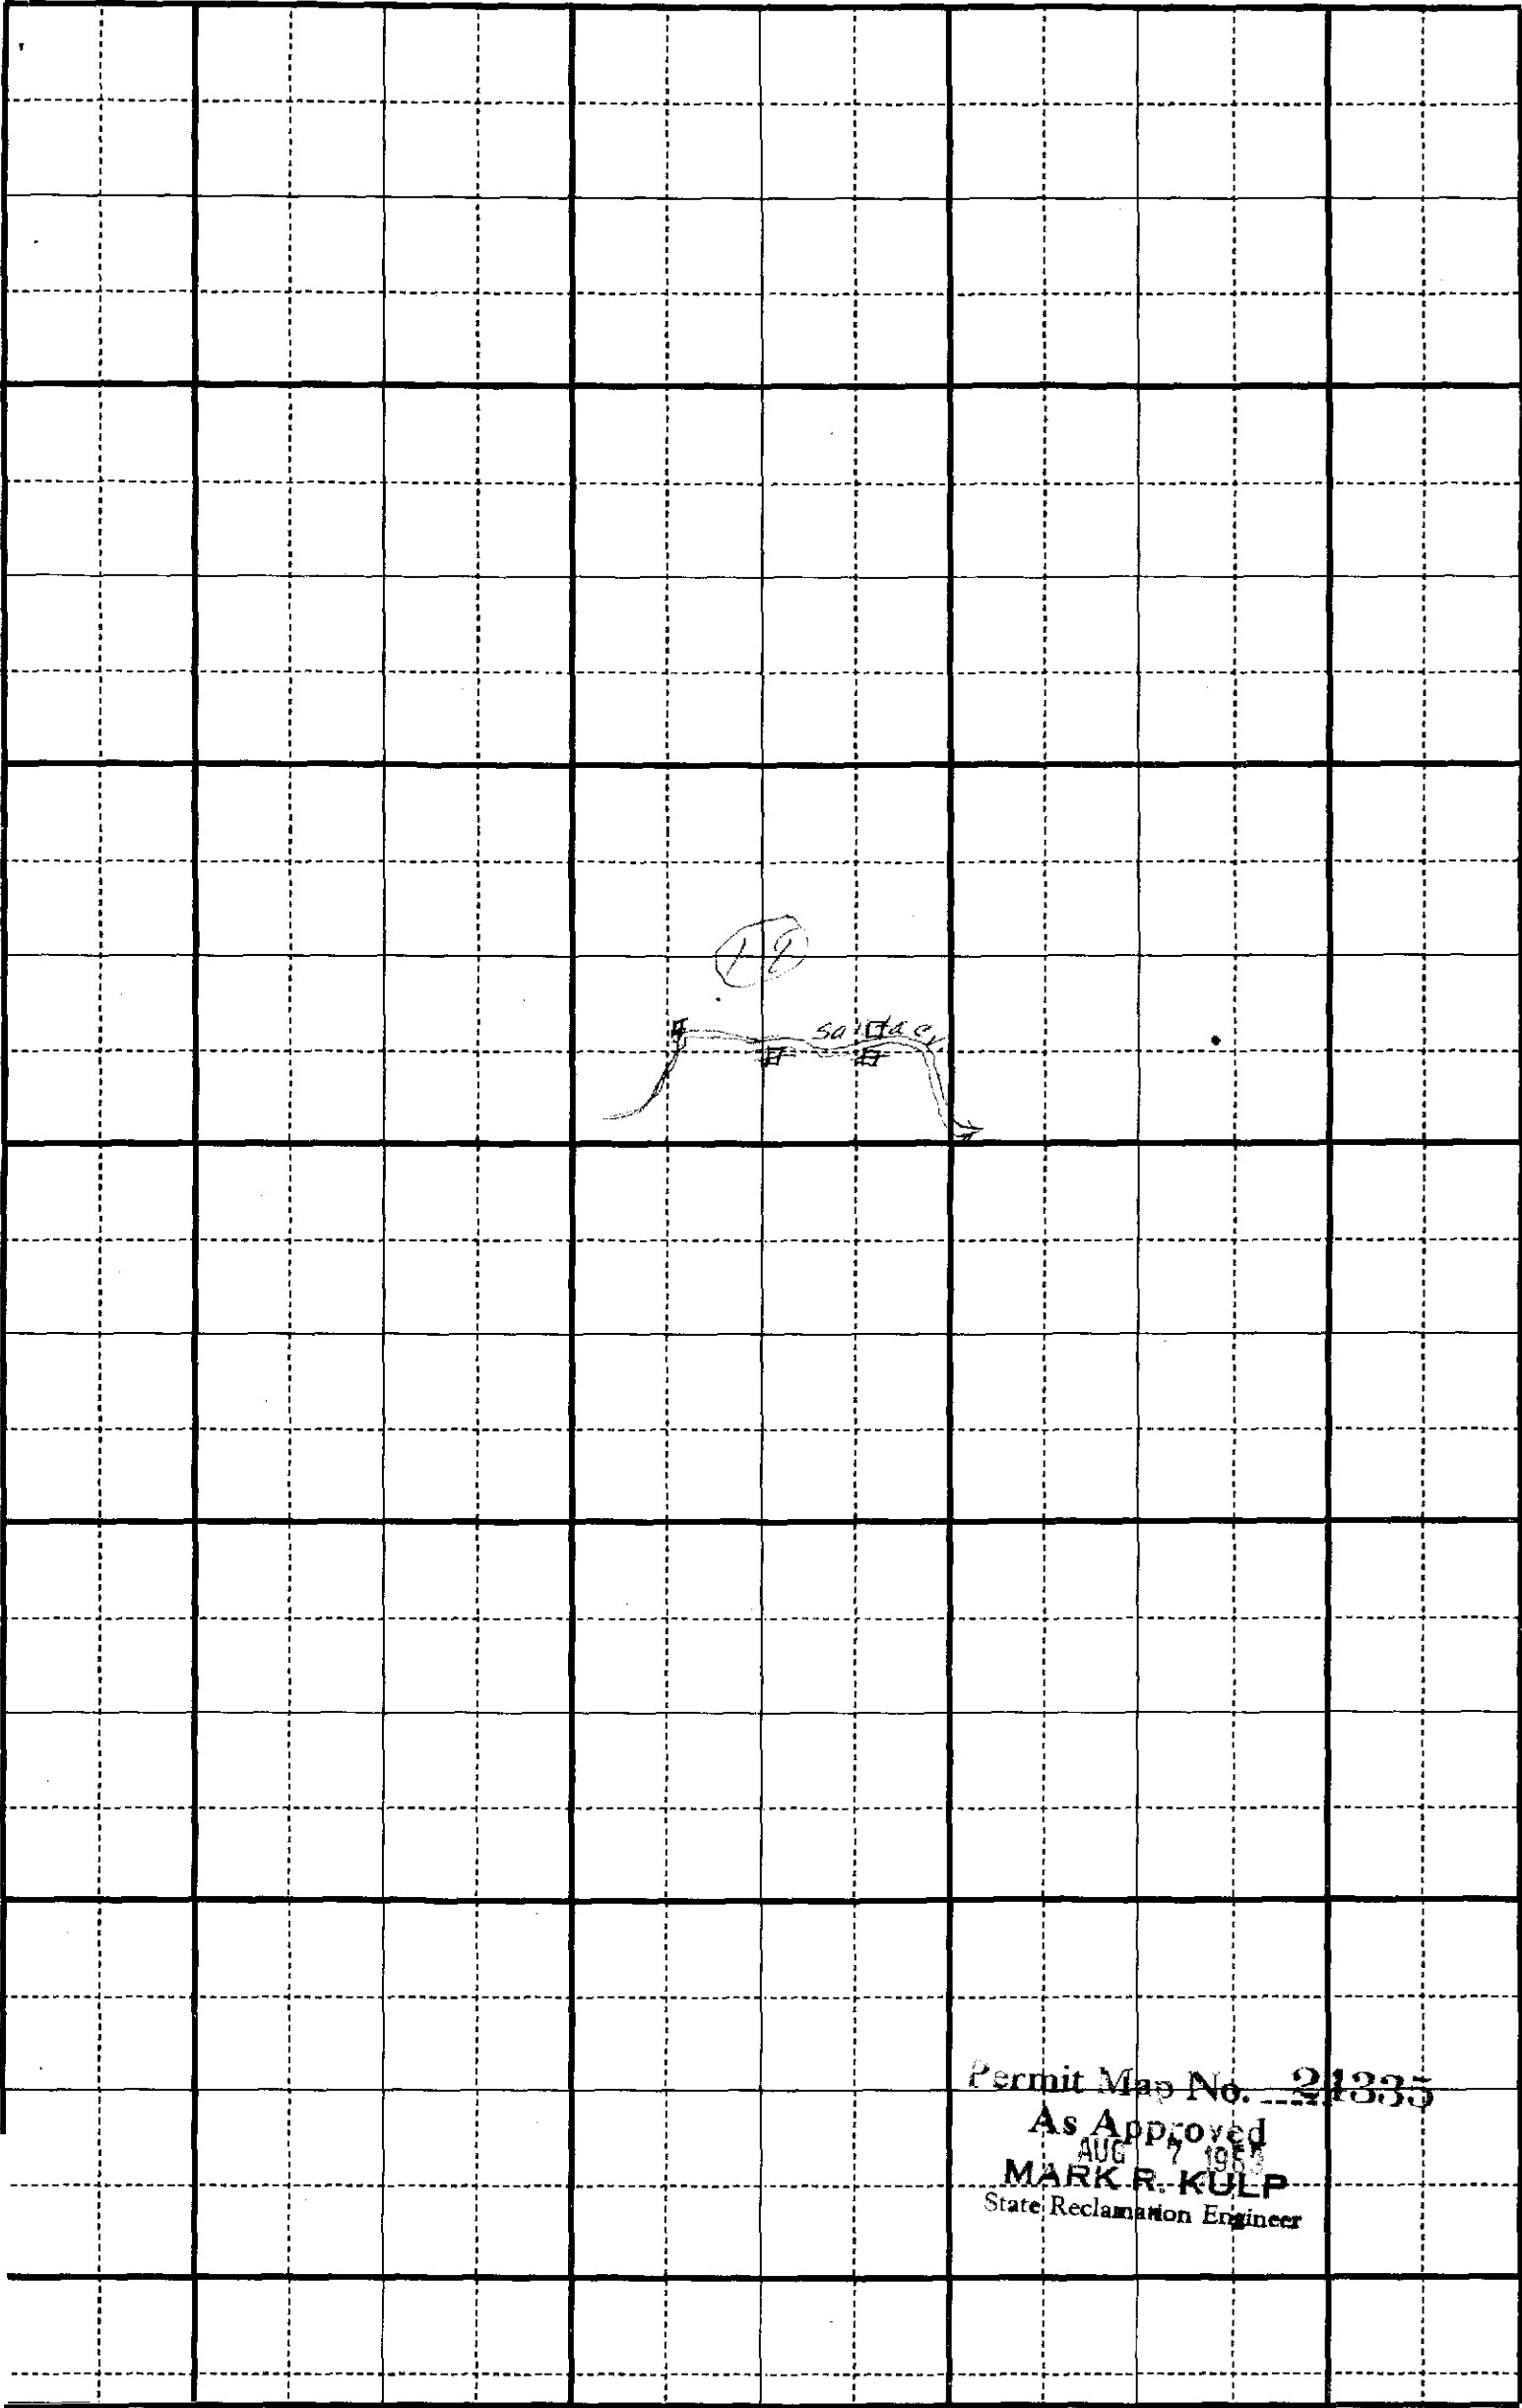

Very truly yours,

MARK R. KULP
