Dear Mr. Jenkins:

Thank you for payment of \$13.00 fees for certificates of water right under Permit No. G-27384. The certificates will be issued in the near future.

The flow from the well was measured July 23, 1964 through a Sparling Meter which we consider to be the best method for accurate measurement of water from a pipe. As only 60 acres of grain was being irrigated, it would seem that the amount of water is probably about the present capacity of the works.

RE: Permit # G-27384

Dear Mrs. Rule:

Enclosed herewith is our cashier's check in the amount of \$ 13.00 in full payment for our final registration certificate.

We were rather surprised at the considerable reduction in the rated capacity of our well to 37 miner's inches as contained in your letter of August 7th. Information that had been furnished to us previous years indicated the capacity of the well was substantially more than what has been indicated.

Were we to find at a later date the well was actually producing more, or if we were to increase the horsepower on our present pump, or place a new pump on the well, is there an opportunity for a review of our established right?

Sincerely,

William G. Jenkins

Will conduct about 4 second feet but for practical use delivery

conveyed: Have seen 4 second feet but for efficient handling the smaller
amount above specified is the normal use

Ques. 6. If for irrigation, show number of acres irrigated in each subdivision, giving
full legal description:

Approximately 100 acres of land is being watered same being located as follows

15 acres in E $\frac{1}{2}$ SE $\frac{1}{4}$ SE $\frac{1}{4}$ Sec. 23; 35 acres in SW $\frac{1}{4}$ SW $\frac{1}{4}$ Sec. 24; 25 acres in NW $\frac{1}{4}$ NW $\frac{1}{4}$
