RE: Permit No. 0-242 59

Mr. Chester Eliason
Holbrook
Idaho

Dear Mr. Eliason:

This is in reply to your letter of October 20th.

I do remember that you said your well would not irrigate more than 40 acres but you will recall we agreed upon 60 inches as probably being an average output from the well. But if you desire this water made appurtenant to only one 40 acre subdivision, it will be necessary to cut the quantity permissible on the permit down from 60 inches to 40 inches because under State Law one inch per acre is considered sufficient for irrigation purposes.

As a general rule, anyone owning land and using water to irrigate that land always wants the water appurtenant to as much of the land as can be covered by the water and this can be easily understood because it makes it possible to mingle the water from the well and the creek and irrigate anywhere on your farm without there being any question regarding the legality of your operation.

The report was made as it was and turned in that way because we felt it was to your best interest and in a procedure that is common practice.

However, if you desire that this water be made appurtenant to one individual 40, please specify which 40 acre subdivision you want it appurtenant to and I will be glad to change the report to suit you. It will also reduce your fees on that portion from \$14.00 down to \$2.00 making a total of \$7.00 that you will owe in this case.

ATTENTION: Mr. E.L. Scott

Dear Mr. Scott:

We now have on file the report of our field engineer on examination for completion of works and beneficial use on Permit No. G-24259 in the name of Chester A. Eliason, which shows that his well in the NE $\frac{1}{4}$ SE $\frac{1}{4}$ Section 9, Township 14 South, Range 32 East, B.M., will deliver 60 inches or 1.2 second feet of water, which has been used to irrigate 170 acres of land in the SW $\frac{1}{4}$, SW $\frac{1}{4}$ SE $\frac{1}{4}$ Section 10; and the NE $\frac{1}{4}$ NW $\frac{1}{4}$, NW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 15, same Township and Range.

A Certificate of Completion of Works and License can, therefore be issued for 1.2 second feet of water upon receipt of the statutory fees amounting to \$5.00 for completion of works and \$14.00 license fee, the latter being at the rate of \$2.00 for each 40 acre subdivision irrigated.

Dear Mr. Kulp:

Mr. Chester A. Eliason, the holder of the above permit received your notice of October 4, 1955, wherein you allege that that because the terms of said permit have not been complied with that said Permit is being held for cancellation, apparently upon the ground that the works have not been completed as of July 3, 1955.

It is difficult to understand from this notice just what you have in mind when you state that "the terms and conditions of Permit No. G-24259 . . . have not been complied with as to Completion of works July 3, 1955".

Mr. Eliason states that he has submitted final proof to your office. Another letter out of your office dated June 27, 1955 states: "This completes your proof but before final action is taken the law requires that a field examination be made by an engineer from this Department." This engineer who was to have made the field examination has not contacted Mr. Eliason, and we must presume that he has not made such an examination, and the reason that a License has not issued out of your office is the lack of such an examination.

Please advise as to the deficiency, if any, which ^{exists} ~~is lacking~~ in the final proof or otherwise.

Very truly,

Ray & Scott
