(Explanation remarks)

The red check marks show land irrigatable under canal or ditch shown as (New Canal) but is an old ditch canal we have been using to partly irrigate parts of these lands, which ditch we are enlarging to take care of the additional lands to irrigate that we have that are checked in red and this ditch is now built and used to the Tp. line between 14 and 15; and which we will continue and build through Tp. 15 above the lands to be irrigated therein not now irrigated.

And will also use the ditches we have on the East side of the Malad River channell to irrigate and additional lands there that may need a little more water from our other reservoir to be built shown herein for its dam in SE $\frac{1}{4}$ NE $\frac{1}{4}$;16-14-35 E.

And we claim by this subsequent filing in connection with our filing of 1940 extended by World War II; all the waters of Big Malad River stored and used with and through these 2 reservoirs, the lower one of which is already now built and used and the other one is now in progress for being built which work was commenced in year 1946.

CONDITIONS OF APPROVAL AND REMARKS

1. Use of water under these rights may be affected by an agreement between the protestant and the right holder.
2. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the lands above.
3. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
4. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
- * 5. The total instantaneous diversion of water from all points of diversion under Transfer 5276 shall not exceed 28.50 cfs.
- ** 6. Right 15-02023 is limited to the irrigation of 3215.0 acres in the place of use described above in a single irrigation season.
- ** 7. Right 15-02024 is limited to the irrigation of 3215.0 acres in the place of use described above in a single irrigation season.
- ** 8. Right 15-02025 is limited to the irrigation of 6735.0 acres in the place of use described above in a single irrigation season.
- ** 9. Rights 15-02023 and 15-02024 when combined shall not exceed the irrigation of 3,215 acres, and when combined with Right 15-02025 shall not exceed the irrigation of 6,735 total acres.
- ** 10. The right holder shall cease irrigation of 10 acres previously authorized under this right, and consolidate use of water on the remaining 7,110 acres.
11. Approval of Transfer 5276 does not grant any right-of-way or easement for use of a delivery system owned by person(s) other than the right owner.

CONDITIONS OF APPROVAL AND REMARKS

1. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the lands above.
2. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
3. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
- * 4. Right 15-02023 is limited to the irrigation of 3215.0 acres in the place of use described above in a single irrigation season.
- * 5. Right 15-02024 is limited to the irrigation of 3215.0 acres in the place of use described above in a single irrigation season.
- * 6. Right 15-02025 is limited to the irrigation of 6735.0 acres in the place of use described above in a single irrigation season.
- * 7. Rights 15-02023 and 15-02024 when combined shall not exceed the irrigation of 3,215 acres, and when combined with Right 15-02025 shall not exceed the irrigation of 6,735 total acres.
8. Approval of Transfer 5233 does not grant any right-of-way or easement for use of a delivery system owned by person(s) other than the right owner.

Postoffice address: **Samaria**

County **Oneida**

State **Idaho**

- I. If applicant is a corporation, give:

re-

(a) Date and place of incorporation **March 12, 1924, Samaria, Ida.** Amount of Capital Stock: \$ **20,000.00**

(c) Amount paid in: \$ **14,400.00**

(d) Names and addresses of directors: **David Hughes, Daniel M. Price, Samaria, Idaho; Elmer Price, John J. Roderick, Nephi R. Ipsen, John E. Blaisdell, of Malad, R.D. No. 1, Idaho; and J. F. Fredrickson, of Malad, Idaho**

- II. The financial resources of the corporation are:

(a) Cash on hand: \$ **500.00**

(b) Treasury Stock: \$ **None**

(c) Bonds to be issued: \$ **None**

(d) Other resources: **Assessments privileges**

2. Quantity of water to be stored: **1500** **Big Malad River Spring** acre feet per annum.

3. Source of water supply is **Big Malad River and** (Creek) (River) (Spring), a tributary of **Big Malad River**.

4. The outlet of the proposed reservoir is located **about 320** feet, distant from the **SE** corner of Section **16**, Township **14 S.**, Range **35 E.**, B. M. and is in the **SE** $\frac{1}{4}$ of **NE** $\frac{1}{4}$ of Section **16**, Twp. **14 S.**, Range **35 E.**, B. M. County of **Oneida**

5. Fill out either (a) or (b).
(a) The reservoir is located in the channel of **Big Malad River** (Creek) (River).
(b) The reservoir is to be filled through a feeder canal, the point of diversion for which is located **Reservoir to be filled from Big Malad River Spring at head of river and in the Big Malad River** feet distant from the **channel for Reservoir and Malad River Spring is in** corner of Section **9**, Township **14 S.**, Range **35 E.**, B. M., and is in the **SE** $\frac{1}{4}$ of **NE** $\frac{1}{4}$ of Section **9**, Township **14 S.**, Range **35 E.**, B. M.; width at bottom **feet**, width at top **feet**, depth of water **feet**; average grade per mile **6** feet; Capacity **22** cubic feet per second.

6. (a) The area of the high water line of the reservoir is **about 25** acres.
(b) The reservoir capacity is **about 1500** acre feet.

7. Height of reservoir dam **55** feet, length at top **600** feet, length at bottom **125** feet, size of outlet **30" diam.** pipe feet
by **feet**. The dam is to be constructed of materials as follows: **Earth with concrete core 125 ft. by 20 ft. by 2 ft. thick reinforced with 315 foot 30 in diameter Galvanized outlet pipe running through Dam; with approved steel headgate for same; and outlet gate at bottom of channel.**

(If height will exceed 10 feet, plans must be approved by Department of Reclamation, before beginning construction.)

8. (a) Will water stored in reservoir be diverted to canal or aqueduct, thence to land to be irrigated without commingling with natural flow of **Big Malad River** (Creek) (River)? **Yes**, and when all the stored water is used we continue with **natural flow of River water for its uses for irrigation purposes, including irrigation of the meadow lands in**
(b) Water stored in reservoir will be carried in the channel of **Big Malad River** (Creek) (River), a distance of **one** miles to point of diversion located in channel about **1000** feet, distant from the **SW** corner of Section **22**, Township **14 S.**, Range **35 E.**, B. M., and in the **SE** $\frac{1}{4}$ of **NW** $\frac{1}{4}$ of Section **22**, Township **14 S.**, Range **35 E.**, B. M.

9. Amount of water claimed from **Big Malad River Spring** (Creek) (River) (Spring) in addition to that stored in reservoir **22** cubic feet per second.

10. Water is to be used for **Irrigation and culinary** purposes.

11. If for mining, milling, power or manufacturing purposes give:

(a) Point of use of water **feet**, distant from **Corner of Section**, Township **Range**, B. M. and is in the **$\frac{1}{4}$ of $\frac{1}{4}$ of Section**, Township **Range**, B. M.
(b) Amount of power generated: **H. P.** under **feet head**.
(c) Water is to be returned to **(Creek) (River) (Spring) at a point** feet distant from the **corner of Section**, Township **Range**, B. M., in the **$\frac{1}{4}$ of $\frac{1}{4}$ of Section**, Township **Range**, B. M.

12. Water stored in accordance with this Permit will be carried to place of use through a canal heretofore constructed under the terms of Permit No. **R-637** and **19072**, which is hereby referred to and made a part hereof.

winter time for any surplus waters we may have,

13. Kind of diversion works: Earth canal from outlet of said Dam
(Dam, canal, flume, pipe, etc.)

14. Height of diversion dam: 40 feet, length at top 400 feet, length at bottom 200 feet. The dam is to be constructed of materials as follows: Earth and concrete core

(If height will exceed 10 feet, plans must be approved by Department of Reclamation, before beginning construction.)

13. Size of headgate: Width $2\frac{1}{2}$ Dia. feet, Height 55 feet.

16. Diversion Canal: Width at bottom 4 feet, width at water line 6 feet, depth of water 2 feet, Dimensions of Flume Water from outlet of the
goes directly into distributing canal
Diameter of Pipe 30 inches; Length of conduit Canal 8 miles. Average grade per mile 3 feet.

17. Estimated cost of Works: Storage Works: \$ 40,000.00 Diversion Works: \$

18. Time required for completion of work Five (5) years.

19. Time required for complete application of water to proposed beneficial use is **Five (5)** years.

20. The land to be irrigated is described in the following tabulation:

(Give Irrigable acreage in each 40-acre subdivision.)

Twp.	Range	Sec.	NE $\frac{1}{4}$				NW $\frac{1}{4}$				SW $\frac{1}{4}$				SE $\frac{1}{4}$				Totals
			NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$	NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$	NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$	NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$	
			All Class 1 and 2 arable land with supplementary water for lands now partially irrigated; as per map hereto showing irrigable land; and lands now under our system, and adjacent to the main distributing canals and ditches.																

Total Number of Acres to be Irrigated

Remarks: The intent of this application is to amend our application of March 1st, 1947, filed in the office of State Engineer of Idaho, at Boise, Idaho, made on Form No. 1, and hereto made on Form No. 2 which includes storage privileges for our company.

The red checked marks show the land irrigable under canal or ditch shown as (new canal) but Jean old ditch canal we have been using to partly irrigate parts of these lands, which ditch we are enlarging to take care of the additional lands to irrigate that we have; that are checked in red; and this ditch is now built and used to Tp. line between Tp. 14 and 15, and which we will continue to build through Tp. 15; above the lands to be irrigated therein not now irrigated.

(Continued on next page)

BE IT KNOWN That the undersigned hereby makes application for permit to construct a reservoir and store and appropriate the public waters of Idaho as herein set forth, and that the enclosed map is hereby made a part of this application.

Agent.

State Reclamation Engineer

Date of first receipt at office of Commissioner of Education 11:30 A. M. April 18, 1947

Returned to applicant for correction

Corrected application received

STATE RECLAMATION ENGINEER
APPROVAL OF ~~COMMISSIONER OF RECLAMATION~~

The number of this permit is R 791

Recorded in book R 3, page 791 Approved July 31, 1947

This is to certify that I have examined the within application for a permit to construct a reservoir and store and appropriate the public waters of the State of Idaho, and hereby approve the same, subject to the following limitations and conditions:

Bond in the sum of \$ _____, to be filed on or before _____

Work to begin on or before **September 30, 1947**

uninterruptedly to completion, unless temporarily interrupted by circumstances over which the permit holder has no control. Subject to regulation of lower existing

One fifth of the work above specified to be completed on or before January 31, 1950

The whole of said work to be completed on or before July 31, 1952

Beneficial use of water stored in accordance herewith, to be made on or before **July 31, 1958**

Witness my hand this 31st day of July

• 19 47 MARK R. KULP

~~Commissioner of Reclamation.~~
State Reclamation Engineer

IN TESTIMONY WHEREOF, We, C. A. ROBINS, Governor of the State of Idaho, and J. D. "CY" PRICE, Secretary of State of the State of Idaho, have caused this instrument to be executed in the name of the State of Idaho and caused the Great Seal of the State of Idaho to be hereunto affixed, this 31st day of July, 1947.

(S E A L)

Countersigned:
By J. D. "CY" PRICE
Secretary of State

STATE OF IDAHO
By C. A. ROBINS
Governor

REMARKS (Continued) And we will use the ditches we have now on the East side of the Big Malad River channel to irrigate any additional lands there that may need a little more water that we can give from this proposed reservoir to be built as shown herein for its Dam to be in the SE $\frac{1}{4}$ of NE $\frac{1}{4}$ of Sec. 16, or in NE $\frac{1}{4}$ of SE $\frac{1}{4}$ of Sec. 16, Twp. 14 S., Range 35 E., B.M. as the best site turns out to be, which will be at about the division line between the above two subdivisions of land and be on either side of said division line between said two subdivisions.

And we claim all the waters of Big Malad River and those running into its channel and all the waters of Big Malad River Spring at its headwaters.

For the present we propose to take the water out of this proposed reservoir through our now built Reservoir in Section 15 and 22 in Twp. 14 S., R. 35 E., B.M. under Permit R 637 and 19072 and to enter the same distributing canal for distribution as is now used out of our present Dam in Sec. 22 and said canals for distribution also shown on the accompanying map. We also reserve the right to take waters out of this proposed reservoir Dam at its outlet at Dam through a distributing canal to additional and higher lands to be irrigated.

CERTIFICATE OF COMPLETION OF WORKS

To All Whom It May Concern:

This is to certify that SAMARIA WATER & IRRIGATION COMPANY, A Corporation, of Samaria, County of Oneida, and State of Idaho, the holder of Permit No. R-791, issued upon Application No. R-27671, bearing date of priority of April 18, 1947, authorizing the construction of a reservoir, with the right to appropriate and store 1500 acre feet per annum of the waters of Big Malad River and Big Malad River Spring, in the County of Oneida, State of Idaho, for Irrigation and culinary purposes, has fully complied with the provisions of the laws of the State of Idaho relating to the proof of completion of the works set out and described in said Permit; that said works include a dam and reservoir adequate for the storage of 1500 acre feet of water per annum, with adequate diversion works and conduit to the reservoir, and a conduit capable of conducting said water to the place of intended use; that the point of outlet of said reservoir is located in the SE $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 16, Township 14 S., Range 35 E., and that the place of use, or the lands proposed to be irrigated by the use of said water, are described as follows, to-wit: 5500 acres in Sections 22, 23, 27, 28, 34, 35, Twp. 14 S., R. 35 E., B.M. and Sections 1, 2, 3, 10, 11, 12, 13, 14, 15, 23, 24, 25, Twp. 15 S., R. 35 E., B.M.

Witness my hand this 27th day of August, 1952.

MARK R. KULP

MEMORANDUM

TO: Files 15-02023/02024/02025/02074 & 02075

FROM: Pam Skaggs²⁸/State Office

SUBJECT: Transfer 5233

DATE: October 23, 1998

Transfer 5233 changes the place of use under Rights 15-02023/02024/02025/02074 and 02075. The applicant is changing the place of use under the combined right system to include new land for a shareholder. The transfer also identifies the 7120.0 acre common place of use for these rights, and clarifies sources and uses.

Season of use for irrigation and irrigation from storage, and diversion volume were adjusted to current standards. Source and tributary names were corrected to match the names as identified on the USGS map.

Recommended conditions include irrigation overlap, permissible place of use limits for the non-storage rights, combined right limits, right-of-way and standard transfer conditions.

RE: Permit No. R-791

Samaria Water and Irrigation Co.
c/o Mr. William H. Jones, Sec.
Route 1
Malad, Idaho

Gentlemen:

Permit No. R-791 was issued on July 31, 1947 for 1500 acre feet and Certificate of Completion of Works was issued pursuant to your affidavit that the works were capable of storing 1300 acre feet of water.

In reviewing plans for enlargement of the reservoir, we find that the actual capacity of the reservoir is only 700 acre feet and can be honored only for this amount under the R-791 priority.

It will, therefore, be necessary to make application for permit to appropriate and store the additional amount necessary to fill the enlarged reservoir above the 700 acre feet capacity of the existing reservoir.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

Samaria Water and Irrigation Company
Rt. # 1
Malad City, Idaho

Attention: Nephi R. Ipsen

Dear Mr. Ipsen:

Enclosed is a map as it appears to Mr. Price of your district where the water in above permits is used. It is being sent to you for your inspection and checking. In as much as, you said the water belonged to individuals rather than to land it would be well for each individual concerned to check the map and see if he has land within the area of this map.

If there are other forties that use the water, please indicate them with an "x". If the number of acres in any forty is wrong, please write in with red pencil the correct acres.

Also, if any ditches are wrong or additional ditches should have been included, please put them in with a red pencil.

As soon as you have returned this map duly corrected, I will turn in a report and we will then recheck everything after which you will hear from this office again.

Very truly yours,

Re: Permit B-791 - B-637
19072

Samarita Water & Irrigation Co.
N. R. Ipsen
R. F. D. #1
Malad, Idaho

Gentlemen:

This is in reply to your letter of April 1, requesting information regarding the value of a license.

If you were to ask me "Just what is a water license?" I would say it is a legal document put out by the Idaho State Department of Reclamation that bears the seal of the State Department of Reclamation and is signed by the State Reclamation Engineer. It states that there is a given amount of water from a given source of supply with a specified priority and a specified point of diversion, and listing the lands irrigated giving the number of acres irrigated in each 40-acre subdivision.

You could ask "What is the value of a license?" and it could be summed up as follows:

1. It is a legal document that sets out all of the conditions of a given water right.
2. When one has such a license it is no longer necessary to make proofs of the right by witnesses or notarized statements; all that is necessary is to show the license.
3. It is a legal document that shows right to use water, a right that can be transferred from one piece of land to another.
4. It is a legal document that can be used to transfer a right from one individual to another individual.
5. It is a legal document that is acceptable in court as proof that a right exists.
6. It is a legal document that is accepted without question regarding the facts covered in the document.
7. It is a document of which there is a copy in the State House and if the original is lost or destroyed a duplicate may be obtained by payment of a fee for copying and certification.

Sc.

R-791

April 6, 1959

Page Two - Continued - Samaria Water & Irrigation Co.

8. Usually a right of record such as a license is required by loan companies throughout all of South Idaho before making a loan on a given piece of land.

9. Licensed rights on a decreed stream are recognized by the State Supervisor of Water Distribution and delivery on same is made according to their priority.

10. A license is paid for but once. It is valid at all times thereafter.

11. It does not give this department or any other agency in the State any authority over you or the right without your consent.

12. A licensed right is never considered abandoned merely by reason of non-use. There are some of the values that come to mind at this time, and undoubtedly others exist.

In case you wish to know the difference between a license and a permit it is as follows:

A permit sets out the facts concerning anticipated use of water. It is in effect a contract between the person owning it and the State of Idaho. It is the intent of the law that a permit shortly matures into a license. Its sole value exists only during the limited life it has that is set out in the terms of the permit. If a permit is carried through only the proof of completion of works stage and not through the beneficial use proof stage it will lose priority day by day and thus actually lose its value. In contrast to the permit the license is a finished and completed document beyond which nothing else is required.

The only other "right of record" regarding usage of water that is equal to a license is the right obtained by court decree.

Perhaps a short statement regarding a use right should be made at this time. A use right may be as good and as valid as a right of record but one must always be prepared to go into court and prove that he has a valid use

R-791

Page Three - Continued - Samaria Water & Irrigation Co.

right in case validity is ever questioned. In case of the old use right, such becomes very difficult or perhaps even impossible to substantiate due to the fact, those who can testify move away from the region or perhaps are dead and gone, thus it is a "record right" is much easier to sustain than a use right.

Now a word regarding your dams. The state law definitely requires that the State Reclamation Engineer approve the plans and specifications for any dam in the State of Idaho over 100 feet in height or impounding 100 acre feet or more of water. I am enclosing a leaflet that quotes the state law regarding this.

I hope this gives you some of the information you desired, and thank you for your inquiry.

Yours truly,

GEO. N. CARTER
State Reclamation Engineer

Dear Mr. Woodward:

The Samaria Water and Irrigation Company hold Permit No. R-791 of April 8, 1947 with completion of works certificate issued and proof of application to beneficial use due on or before July 31, 1958.

To raise the dam and increase the capacity of the reservoir, it will be necessary to apply for Permit to appropriate and store the additional amount of water and to submit acceptable plans and specifications for the enlargement of the dam.

The permit could be issued without the plans and specifications but enlargement could not start without approval of plans and specifications based on adequate information.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

P.O. Box 1407

March 31, 1954

RECEIVED
APR 1 1954
Department of Reclamation

Mr. Mark Kulp
State Reclamation Engineer
State Capitol Bldg
Boise, Idaho

Dear Mr. Kulp:

In the spring of 1947, the Samaria Irrigation Company secured approval from your office for the construction of a dam on the Big Malad River in Section 16 T 14S, R35E, the reservoir back of the dam to contain about 710 acre feet of stored waters.

Stream flow on the Big Malad River is constant due to the fact that the river originates in the Big Malad Spring in Section 9T 14S, R35E. The present reservoir backs the water up to, but not over the spring area.

In February of this year, the company requested the Oneida Soil Conservation District for assistance in raising the dam to an additional height of 10 feet, the storage at maximum depth will be about 1265 acre feet. This construction would raise the elevation of the water surface sufficient to create about an eight foot head on the Big Malad Spring Area.

The company has requested me to ask you if you would give permission for such additional construction and water storage. Could you give me an answer without additional geologic data.

Very truly yours,

H. J. Woodward
Area Engineer

July 12, 1955

Mr. Alvin J. Thomas
R.F.D. # 1, Box 209
Malad, Idaho

Dear Mr. Thomas;

The difficulties arising from differences in land location and the differences in the quality of water under Samaria Water and Irrigation Company Stock has been brought to my attention on several occasions. I have hesitated to express any opinions because I considered it an internal matter within the Samaria Company.

I do not think there is much question as to the undesirability of continued use of the unmixed Warm Spring water and an investigation of this phase would be more logically made by trained soil chemists or agronomists rather than by the State Department of Reclamation which has no research status or facilities.

The question as to what kind of water a share holder is entitled to is a legal question beyond the authority or competence of the department.

What will happen when all the stock is concentrated on lands that cannot be watered from Warm Spring is speculative and the solution is internally administrative and legal.

If it is possible to develop well water of suitable quality, it might be possible through cooperation to develop groundwater along with increased storage and thus take care of those who are being reduced to the use of the saline waters.

We regret that we cannot offer you any better suggestions.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

Malad, Idaho
July 7, 1955

RECEIVED
JUL 11 1955
Department of Reclamation

Mr. Mark R. Kulp
State Reclamation Engineer
Department of Reclamation
State House
Boise, Idaho

Dear Commissioner Kulp:

I am enclosing a carbon copy of an analysis of water which was sent to the Soil Scientist, James Thorne, of the Plants Industry Department of the Utah State Agricultural College. A similar analysis was made by the University of Idaho and the Utah State Agricultural College five to seven years ago.

Our water company, the Samaria Water and Irrigation Company, is divided, according to the use of the water of the said company, into two sections known as the Northern section and the Southern section. A warm spring known as The Pleasantview Warm Spring, divides the foregoing two sections.

The samples of water from which the above mentioned analyses were made were taken from the Pleasantview Warm Spring. The original filings on said waters of the Samaria Water and Irrigation Company were made by the Southern section of water users. Shares of stock have been purchased from the Southern users by the Northern users until at present a majority of said company's shares is in the hands of the Northern users.

Originally the filing pioneers had two canals, one canal carrying water from the Pleasantview Warm Spring which did not freeze during the winter, was used entirely for watering their stock in the winter. The other canal carried water from what is known by the company as "The Big Spring", which, by the way, is the head of what is known as "The Big Malad River." The water from the Big Spring is known to be of excellent quality for irrigational purposes.

Two reservoirs have been built by the company to impound the runoff of fresh water from The Big Spring.

To increase the quantity of irrigation water, as shares were purchased from the Southern users the Northern users have insisted over the objections of the Southern users, that a small proportion of fresh water be mixed with the saline waters of the Warm Spring to be used solely for irrigation purposes by the Southern users. As more shares have been purchased by the Northern users more and more of the objectionable water has been forced upon the Southern users, until at the present time the Southern users are insisting that the injustice of the past and present be remedied. Most meetings which are held by said company end in riots.

2-791

In further explanation as to the cause of so much water being transferred from the Southern section to the Northern section, please note: As the old pioneer users have passed away and left their estates to their heirs, many of their heirs have moved away from the Southern section and have inherited shares of stock which have not been pertinent to the land. The Northern users have been very anxious to buy their shares and have been willing to pay much higher prices for these shares due to the fact that when southern shares are transferred to the north they somehow become fresh water as they are used above the Warm Spring, and when Southern users purchase the same shares they remain saline. Much of the land which became dry through transfer of stock has been supplied with irrigation by the digging of wells. All annual assessments and all assessments for the development of more fresh water are shared equally by both the Northern and the Southern users.

A new project is now being proposed for the development of more fresh water which will call, in all probability, for an outlay of \$80.00 to \$90.00 per share. This new development in no way assures the Southern users that the inequalities of the present will be remedied.

The minimum estimate given to the shareholders calls for the raising of the upper dam, and this estimate does not take into consideration a right of way, new road building, enlarging canal, extension of canal, and a new outlet in the lower reservoir of fresh water. The estimate for raising the reservoir calls for an outlay of \$31,000.00.

Mr. Kulp, the Southern users are appealing to you and your department to see if there is a way by which you can help to see that an equitable settlement be made in this controversy.

Trusting that I may hear from you at your convenience and sincerely desiring that you may see fit to make a study of this yourself, or your representative, by coming to our community in the near future, I am

Very sincerely yours,

P.S. This is written by request of the Southern users.
P.S. If you find it desirable to contact me my home is in Samaria, eight miles south-west of Malad. My mailing address is as stated above. If you come to our community when I am not at home, please contact either of the following: Walter Williams, Louis Waldron, L. G. Waldron or Bill Hill.

R-791

July 6, 1955

Mr. Alvin J. Thomas
Malad, Idaho

Dear Mr. Thomas:

The analytical data obtained on the sample of water representing a mixture from the two warm springs at Pleasant View show the composition is very similar to our original analysis made several years ago. It also agrees with the analysis made at the University of Idaho, indicating that the water is of very poor quality for irrigation. It falls in Class C3-S2 of the new U. S. Salinity Laboratory classification. It is on the poor side of Class 3, in this class, which is a rather broad one, including water which I would say is of fair quality to water which is of very poor quality. To make this water as good as the middle of Class 2, in other words a C2-S1 water, it would require a dilution of three parts of very pure water with one part of this spring water. Obviously, the ratio of this water to any water with which it might be diluted in order to bring it up to better quality would depend upon the quality of the better water with which it would be mixed. Without knowing the composition of the water from the upper reservoir we cannot say exactly what proportions would be required. The three parts of good water mentioned above would refer to absolutely pure water, such as distilled or rain water; none of the natural waters in this area are this pure.

The water represented by your samples involves considerable hazard in the formation of a saline, or white alkali, soil. There is also some hazard involved with regard to the formation of black alkali. Crop plants would have to have reasonably good salt tolerance to do well when irrigated with this water. Sensitive crops, like the tree fruits or berries, beans, peas, and potatoes, would not do well when irrigated with this water. If a hay-grain type of farming were practiced, somewhat more salt in the soil could be tolerated, but even so it would be necessary to run more than a fourth of this water right on through the soil in order to remove the soluble salts which would be added by normal irrigations. Besides the limitations of crops involved with the use of poor quality water there is the disadvantage of having to use more of the poor water in order to keep the salt concentration down. There is a further restriction that the soils must be permeable and well drained, or this leaching cannot be effective and salts will accumulate rapidly.

Data obtained on the sample are in the attached table. Also attached is an itemized statement of charges. Please make check payable to the Soils Laboratory.

Very truly yours,

James P. Thorne
Soil Scientist

R-791

NOTES

1. Electrical conductivity is expressed as E.C. x 10^6 (micromhos).
2. T.D.S. -- Total dissolved solids (by evaporation).
3. PPM -- Means parts per million parts of solution.
EPM -- Means equivalents per million equivalents; one equivalent weight of element, ion, or salt in one million weights of solution.
4. Sodium percentage is the ratio of sodium to the total cations on an equivalent basis, multiplied by 100.
5. Classification is based on the chart listed below, which was taken from Circ. No. 784, May 1948, "Explanation and Interpretation of Analyses of Irrigation Waters" by L. V. Wilcox.
6. Should the salts be largely composed of calcium sulfates, it may be permissible to raise the value for either the salt level or the electrical conductivity level by 50% on the chart, thereby giving a higher rating to the water in question. Usually this means one jump such as from "Unsuitable" to "Doubtful to Unsuitable."
7. Permissible limits for boron of several classes of irrigation water

Classes of Water	Crop Groups		
	Sensitive	Semitolerant	Tolerant
	P.p.m.	P.p.m.	P.p.m.
Excellent	< 0.33	< 0.67	< 1.00
Good	0.33 to .67	0.67 to 1.33	1.00 to 2.00
Permissible	.67 to 1.00	1.33 to 2.00	2.00 to 3.00
Doubtful	1.00 to 1.25	2.00 to 2.50	3.00 to 3.75

Re: Permit No. R-791

Mr. Nephi R. Ipsen, Agent
Samaris Water & Irrigation Company
Malad City, Idaho

Dear Mr. Ipsen:

Statutes requires a field inspection in connection with the proofs on Permit No. R-791 before license and certificate of water right can be issued.

Such inspection and report on same is required for any and all permits being brought to license within this State.

An inspecting Engineer from this Department requests that you or someone familiar with the terms of the permit and representing you be prepared to accompany him on the inspection, on Thursday, October 9, 1958.

If he cannot get in touch with you by phone or otherwise he will drive to the well location or point of diversion given in the permit.

Very truly yours,

GEO. N. CARTER
State Reclamation Engineer

NOTICE OF PROOF APPLICATION OF WATER TO BENEFICIAL USE

Notice is hereby given that at 10:00 A.M. on the 31st day of July, 1958, at Malad, County of Oneida, State of Idaho, before William H. Fallis, Probate Judge, in the Court House, proof will be submitted of the application to beneficial use of 1500 Acre feet of the waters of Big Malad River and Big Malad River Springs in accordance with the terms and conditions of Permit No. R-791 heretofore issued by the State Reclamation Engineer of the State of Idaho.

The name and postoffice address of the company holding said permit is Samaria Water & Irrigation Company, Samaria, Idaho.

The use to which said water has been applied is irrigation and culinary.

The amount applied to beneficial use is 1500 acre feet.

The place where said water is used: Sections 22-23-27-26-34 & 35 Twp. 14 S., Rge. 35 E; Sections 2-3-1-10-11-12-13-14-15-23-24-25 & 30 Twp. 15 S., Rge. 35 E.

The name of the canal or ditch or other works by which said water is conducted to such place of use is The Malad River channel; and the East Side & West Side distributing canals.

The right to take water from such works is based up Permit No. R-791.

The source of supply from which such water is diverted is The Big Malad River Spring.

The date of priority which said user is prepared to establish is July 31st, 1947.

E. N. HUMPHREY
Deputy State Reclamation Engineer.

6-26 7-17 t4

BOISE, IDAHO

REPORT OF ENGINEER

Permit No. R-791This proof is for Beneficial Use

In Water District No. _____

1. Name of applicant Nephi R. Ipsen - Fer Samaria Water & Irrigation Company
2. Source of water supply: Big Malad River and Big Malad River Spring
3. Location of point of diversion: Is in the SE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 16
T. 14 S., R. 35 E.B.M. County of Oneida
or in the NE corner of SE $\frac{1}{4}$ Sec. 16, Twp. 14 S., Rge. 35 E.B.M.
4. Describe works as they exist, giving dimensions and capacities of same: PHWS

Dam = 130 yds long on crest x 18' W. on crest H = 42' above outlet
Spillway = 10' W. x 5' h. around left end. Concrete lined full
length. Good rock rip-rap. 2 foot freeboard.
Spillway is partially boarded up.
Backs water up to the Big Malad Spring

5. Water is used for: Irrigation and culinary
6. State whether or not water has been turned into works of diversion: yes

7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):

See photo-copy of land list attached.

C/W was issued on their proof for 1300 acre feet.
Actual capacity is about 100 acre feet. License
cannot issue for more.

There is an agreement that lower dam not be filled
to flood the toe of upper dam.

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach?

Remarks: At time of inspection it was that proofs were for the
regard in the dam that had not been made.

There must be some mistake or mis understanding
re this Permit. Dam has never been raised.
There are two springs this spring and a brackish
spring south that comprises the main water supply
for the Samaria Spring Co. also two factions that
can't get together and agree on a bond issue or
use of the waters. Consequently nothing done

Re: Permit No. R-791
Samaria Water & Irrigation Company

Mr. Nephi R. Ipsen
Route # 1
Malad City, Idaho

Dear Mr. Ipsen:

This will acknowledge receipt of the Deposition of Holder and two witnesses, also affidavit of publication in the Idaho Enterprise, all submitted in Proof of Application of Water to Beneficial Use, on Permit No. R-791, in the name of Samaria Water & Irrigation Company.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Very truly yours,

GEO. N. CARTER
State Reclamation Engineer

Permit No. R-791

Proof of Application of Water to Beneficial Use

Deposition of Holder

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. Nephi R. Ipsen, Route 1 Malad City, Idaho, Farmer

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. Samaria Water and Irrigation Company, Samaria, Idaho

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. The date of priority which said user is prepared to establish is 7-31-47 4-18 July 22, 1947.

Ques. 4. State source of water supply and give exact location of point of diversion.

Big Malad River and Big Malad River Spring, the place of diversion is about 320 feet from the SE. Cor. of NE $\frac{1}{4}$ Corner of Sec. 16, Tp. 14, S. R. 35 E. B. M., and in the NE $\frac{1}{4}$ of Section 16, Tp. 14 S. R. 35 E. B. M. County of Oneida of in the NE $\frac{1}{4}$ Corner of Section 16 Tp. 14 S. R. 35 E. B. M.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.

2 Ans. Earth dam with concrete core 125 feet by 20 feet by 2 feet thick reinforced with 315 feet 30 in. diameter galvanized outlet pipe running through dam with approved headgate steel for same; and outlet gate at bottom of channel

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Irrigation, Sections that water is used on 22, 23, 27, 26, 34, & 35 Twp. 14 S. R. 35 E. B. M.; section 23, 1, 10, 11, 12, 13, 14, 15, 23, 24, 25, & (30) Twp. 15 S. R. 35 E. B. M. It is used on cultivated and natural meadow land.

2. Notify ENH.

R-1491

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. Irrigation only

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. Not used for power

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. President of Samaria Water and Irrigation Company

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. The 1500 acre feet of water has been put to beneficial use. See question 6

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. The Warm Spring which arises on the D. M. Price property

(Sign) Nephi R. Jensen

I hereby certify that the foregoing testimony was read to the above subscribed before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed

and sworn to before me, at my office in Malad City, County of Oneida

PERMIT NOR-791

Proof of Application of Water to Beneficial Use

Deposition of Witness

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. Glema H. Swindle, 44, Route #1, Malad City, Idaho, Farmer

Ques. 2. Are you acquainted with Samaria Water & Irrigation Company, a corporation, the holder of Permit No. R-791? How long have you known him and where does he reside?

Ans. 20 years, Names and addresses of directors, David Hughes, Samaria, Idaho Elmer Price, John J. Roderick, Nephi R. Ipsen, John E. Blaisdell of Malad R. D. No. 1, Idaho, and J. F. Fredrickson, of Malad, Idaho

Ques. 3. Have you read or heard read said Permit NoR-791, and are you familiar with its provisions and conditions?

Ans. Yes

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Big Malad River and Big Malad Spring; the place of diversion is about 320 feet from the SE. Cor. of NE $\frac{1}{4}$ corner of Sec. 16, tp. 14, S. R. 35 E. B. M. and in the SE $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 16, Tp 14 S. R. 35 E. B. M. County of Oneida or in the NE $\frac{1}{4}$ Corner of Section 16 Tp. 14 S. R. 35 E. B. M. Reservoir and ditches is the works for conveying water from point of diversion

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. 1500 acre feet; 22 cubic feet per second

Ques. 6. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Irrigation Sections 22, 23, 27, 26, 34 & 35 twp. 14 S. R. 35 E. B. M. Sections 2, 3, 1, 10, 11, 12, 13, 14, 15, 23, 24, 25, & 30 Twp. 15 S. Range 35 E. B. M. the land is cultivated and meadow land

Ques. 7. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. Irrigation only.

Ques. 8. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Sandy loam and it will take the 1500 acre feet of water.

Ques. 9. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. No.

Ques. 10. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I have seen all the water put to beneficial use

NOTICE OF PROOF APPLICATION OF WATER TO BENEFICIAL USE

Notice is hereby given that at 10:00 A.M. on the 31st day of July, 1958, at Malad, County of Oneida, State of Idaho, before William H. Fallis, Probate Judge, in the Court House, proof will be submitted of the application to beneficial use of 1500 Acre feet of the waters of Big Malad River and Big Malad River Springs in accordance with the terms and conditions of Permit No. R-791 heretofore issued by the State Reclamation Engineer of the State of Idaho.

The name and postoffice address of the company holding said permit is Samaria Water & Irrigation Company, Samaria, Idaho.

The use to which said water has been applied is irrigation and culinary.

The amount applied to beneficial use is 1500 acre feet.

The place where said water is used: Sections 22-23-27-26-34 & 35 Twp. 14 S., Rge. 35 E; Sections 23-1-10-11-12-13-14-15-23-24-25 & 30 Twp. 15 S., Rge. 35 E.

The name of the canal or ditch or other works by which said water is conducted to such place of use is The Malad River channel; and the East Side & West Side distributing canals.

The right to take water from such works is based up Permit No. R-791.

The source of supply from which such water is diverted is The Big Malad River Spring.

The date of priority which said user is prepared to establish is July 31st, 1947.

E. N. HUMPHREY
Deputy State Reclamation Engineer.

Permit No. R- 791

Proof of Completion of Works

DEPOSITION OF HOLDER

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. William M. Jones, as Secretary of Samaria Water & Irrigation Co.

Ques. 2. If acting on behalf of a corporation, state its name, principal place of business, your position with reference to same, and your authority for appearing in its behalf.

Ans. Samaria Water & Irrigation Co. at Samaria, Oneida County, Idaho
my position is their Secretary-Treasurer, acting in behalf of said
Irrigation Company, a corporation.

Ques. 3. State number and date of permit, acre feet of water you claim for storage, and source of same.

Ans. 791; Date of Permit; July 31st. 1947; 1300 acre feet; Big
Malad River

Ques. 4. Under terms of permit construction was required to be completed by July 31st. 1952
19.....

Ques. 5. Construction was actually completed on the date of December 31st. 19 47.....

Ques. 6. Does the construction fully comply with the specifications?.....yes.....

Ques. 7. Of what material was the dam built? Earth with a concrete core in bottom
of the Dam, and rock rip-rap.

Ques. 8. State whether or not the water has been turned into your reservoir, and if so, when and to what extent.

Ans. Turned in immediately after completion, for 2/3 the first year
and completely filled the second year.

Ques. 9. The capacity of the reservoir is 1300.....acre feet.

Ques. 10. The area of the high water line of the reservoir is 100.....acres.

Ques. 11. The height of the dam above bottom of reservoir is 55.....feet, above low water
is 45.....feet.

Ques. 12. The dimensions of the spillway are 12 feet wide.....and the bottom of the
spillway is 6.....feet below the top of the dam.

Ques. 13. Dimensions of the reservoir outlet are 30 inches in diameter pipe

Ques. 14. Describe the gate and control unit.

Ans. Auger steel headgate in front of dam at bottom of Reservoir
channel

Ques. 15. The reservoir outlet is made of concrete re-inforced over steel pipe

Ques. 16. Is the reservoir filled through a feeder canal? no (direct on the headwater
spring of the Big Malad River in the main channel of the River.

Ques. 17. If so, where is the point of diversion for same? Big Malad River Spring is located
in

Ans. SE ¼ NE ¼ Section, 9.....Twp. 14 So.....Range 35 E.B.M

P. 791

Ques. 18. Does the feeder canal comply with the specifications in the permit? Yes; on natural /

Ques. 19. If not, explain Reservoir is located directly on the natural stream of the Big Malad River.

Ques. 20. Cost of constructing feeder canal? \$ none Cost of reservoir? \$ 66,000.00

Ques. 21. State whether or not the works from reservoir outlet to place of use are fully completed, and whether or not they comply with the specifications in permit. If not, explain.

Ans. fully completed distribution system for the water now used.

Ques. 22. Water has (has not) been delivered to place of intended use? yes

Ques. 23. Give description of dam, state dimensions, and give slope of face both upstream and downstream. Also method and material for protecting against wave action.

Ans. Earth with concrete core 125 feet by 20 feet by 2 ft thick reinforced; Earth height 55 ft; length at top 600 ft; length at bottom 125 ft; 3 to 1 on upstream and 2 to 1 on downstream side.

Ques. 24. State the purpose for which the water is to be used and give the place of use, and if for irrigation, state the number of acres, and give the legal description of same.

Ans. Water to be used for irrigation & cullinary use; Irrigation on 5500 acres in Sections 22-23-27-26-34-35 in Tp. 14 S.R. 35 E.B.M and Sectmons 1-2-3-10-11-12-13-14-15-23-24-25 in Tp. 15 S.R. 35 E.B,M.

Re: Permit No. R-791
Samarra Water & Irrigation Company

Mr. J. F. Fredrickson
Malad, Idaho

Dear Mr. Fredrickson:

This is in reply to your letter of July 17, 1958, inquiring about witnesses in connection with making Proof of Application of Water to Beneficial Use, under Permit No. R-791, in the name of Samarra Water & Irrigation Company.

A disinterested person could be a non-stockholder, familiar with the terms of the permit and the work done thereunder, however a plain, non-officer but a stockholder, could not be a witness.

Very truly yours,

GEO. N. CARTER
State Reclamation Engineer

Re: Permit No. R-791
Samarra Water & Irrigation Company

Samarra Water & Irrigation Company
Samarra, Idaho

Attention: Mr. Nephi R. Ipsen
President

Dear Mr. Ipsen:

This acknowledges the Notice of Proof of Application of Water to Beneficial Use under Permit No. R-791. This proof is to be made on the 31st day of July, 1958, at 10:00 A. M., before William H. Fallis, Probate Judge,

As of this date we have mailed the Notice to the Idaho Enterprise, with instructions to publish it once a week for four consecutive weeks prior to the date set for final proof and then to mail the affidavit of publication and statement of costs to you.

It is important that the enclosed depositions be executed by you and two disinterested witnesses, who are familiar with the terms of the Permit and the work done thereunder, at the place, on the date, at the time and before the Notary as advertised. It is very important and necessary that each question be answered in detail.

In returning the depositions to this office, be sure that all copies have been signed, the Notary's seal has been placed on each and that all depositions (Holder and two witnesses) are being returned. Also be sure to enclose the Affidavit of Publication.

Very truly yours,

E. N. HUMPHREY

2-791

STATE OF IDAHO
DEPARTMENT OF RECLAMATION

RE: Permit No. B-791

Date May 1, 1958

Samarra Water & Irrigation Co., a Corp.
Samarra, Idaho

Dear Sir:

The date for proof of application of water to beneficial use, as set out under the terms of Permit No. B-791 is due not later than July 31, 1958. If by this date you are not prepared to make this proof, you may make it at a later date, however, your priority will be advanced the same length of time for which the proof is late.

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county.

We enclosed Form 10, in duplicate, which is to be filled out and returned to this department at least forty (40) days before the above mentioned date or before the time you intend to make proof. This form, filled out in duplicate, is to include the time of day, the date (allowing for four weeks publication), the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place that is convenient for you and your two witnesses), the quantity of water filed on, for what purpose it is used, the point or points of diversion and the location of use or lands which are irrigated--all by legal land description.

Also enclosed is Form 11, which is the authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 10.

At the time we send the notice to the newspaper, we will also send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named and before the notary public, as advertised in the publication notice.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

The name of the canal or ditch or other works by which said water is conducted to such place of use is

The Malad River channel; and the East Side & West Side distributing canals.

The right to take water from such works is based upon Permit No. R-791

The source of supply from which such water is diverted is The Big Malad River Spring

The date of priority which said user is prepared to establish is July 31st, 1947

State of Idaho
DEPARTMENT OF RECLAMATION
BOISE

INSTRUCTIONS

PROOF OF COMPLETION OF WORKS

Samarra Water & Irrigation Co.
C/o Wm. M. Jones, Secretary
Route 1, Malad, Idaho

Boise, Idaho **May 1, 1952**

Dear Sir:-

Under the terms of your Permit No. ~~R-791~~..... you are required to complete your diversion works on or before ~~July 31, 1952~~..... I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

MARK R. KULP

State Reclamation Engineer

K/dm

R-791

Malad, Idaho; March 31st. 1948

Department of Reclamation;
Mark R. Kulp; Reclamation Engineer;
Boise, Idaho;

Dear Mr. Kulp;

Your letter of 29th. inst received; with
Three water storage application blanks, for which
we thank you.

Also, if you will Mr. Kulp, we would like you send
a copy of the Plans of the Samaria Water and Irrigation
Company Reservoir Dam, to Mr. E.K.Thomas, Area Engineer
of the U. S. Bureau of Reclamation, of Logan, Utah;
Post Office Box 294.

Sometime ago Mr. Thomas asked us for copy of the plans
for this Dam; but on investigation and examination of
our Company records, we found we did not have a full copy
of the same; the bidders got what plans we had and could
get hold of and all we got back with the bids were the
specifications; and when we got through with the dam
the plans we held for this and the Contractors plans, by
the time they got through with the dam, there was not enough
of them left, that was discernable, to have any plans
readable at all, so what they did have, it seems were
discarded and could not be found.

So our only chance seems to get another retracing from
the original which Mr. Hoffman still has; or that ^{we} may be
able to have you send the Plans you have in your office
to Mr. Thomas, if you will, and then have them returned
to you, if you have to retain them.

However we hope it is possible for you to have Mr. Hoffman
make another tracing from his original if you will. And if
this cannot be done, we would like you to let Mr. Thomas
see the plans you have of the said dam, and he will return same
as he told me this would be acceptable, if we could not get him
an extra copy.

So I will thank you for this courtesy, of you will and
greatly oblige.

Yours very truly,

J. F. Fredrickson

Samaria, Idaho; July 21st. 1947

Mr. Mark R. Kulp;
Idaho State Engineer
Boise, Idaho;

Dear Mr. Kulp;

The Board of Directors of Samaria Water and Irrigation Company met yesterday afternoon at Church House at Pleasantview, Idaho, at 1-30 P.M. with all members of the Board being present; and at this meeting Engineer John L. Hoffman was also present;

Plans and specifications were discussed in preparation for submitting to bidders.

As per your request and decision that waters of Malad River be not backed upon the toe of the new Dam we are contemplating and preparing to build at the site selected, at this meeting it was moved and carried that our Board write you to this effect in guaranteeing the protection you ask for.

And in conformity with the above decision of our Board of Directors in this said matter; we the Board of Directors in meeting assembled hereby assure you and your office; that the waters of big Malad River stored in our present Dam will at all times be guarded against backing the same upon the toe of the present proposed dam to be built on this same said stream.

And our Secretary was authorized to write you this letter that we may now be in position to receive permit to build this proposed reservoir; and please acknowledge receipt of same and oblige.

Yours very respectfully

SAMARIA WATER AND IRRIGATION COMPANY

Boise, Idaho;

Dear Mr. Kulp;

In compliance with our understanding of our now progressing Reservoir project building, in connection with your letter to us of June 18th. inst; we submit you the following to-wit;

Our Board of Directors are now in session at School House at Pleasantview, Idaho, pertaining to getting started on the building of our Reservoir project, with all members of the Board present; and we inclose you herewith;

1. Application to your Dept. for payment to the Engineering firm of John L. Hoffman and Wm. Alexander; engineers for our project Reservoir, for the payment of the sum of \$3375.00 out of the Funds allotted by the 1945 Legislature for surveys and investigation of the smaller water and reservoir project, to be paid and distributed through and by your office, which is for the Engineering services rendered and to be rendered our Water Company in the building of our Reservoir on and in the Big Malad River stream in our Malad Valley and belonging to our Water Company.
2. Also application included in the within inclosure for Permit from your office to build our Reservoir Dam on said Big Malad River stream in the Southeast part of the Northeast quarter of Section 16 Tp. 14 S.R. 35 East Boise Meridian; that we can commence at once on the building of this dam.
3. That we be given the authority to authorize the aforesaid Engineering Firm to prepare and submit and ask for bids for the building of this dam to be submitted to our Board of Directors for approval and acceptance or rejection as provided by contracts.
4. That we ask your office to get into immediate contact with said Engineering firm, whose address and principal place of business is also at your City of Boise, Idaho, to commence work at once for completion of delivery of plans and specifications for bids to build this Reservoir Dam project; and the acquiring of the Permit to Build this Reservoir Dam to be delivered to our Water Company just as soon as possible.

Respectfully Submitted;

SAMARIA WATER AND IRRIGATION COMPANY; Inc.

By David Hughes Its President.

R-491

APPLICATION FOR PAYMENT OF FUNDS FOR SURVEYS AND INVESTIGATIONS of smaller
Water projects as allowed by 1945 Legislature of Idaho

Malad, Idaho, June 25th, 1947

Mr. Mark R. Kulp
Commissioner of Reclamation Engineer of Idaho
Boise, Idaho

Dear Mr. Kulp:

Re-application for permit by
Samaria Water and Irrigation Company; for
Storage Waters; and Appl. of Sept. 24th,
1946 for funds of State of Idaho; allowed
for surveys and investigations of smaller
Reservoirs; and approved Nov. 13-1946 and
January 8th, 1947

The Board of Directors of the Samaria Water and Irrigation Company met this day June 25th, 1947, at 8:00 P. M. at the School House at Pleasantview; R. D. No. 1; Idaho, for purpose of continuing with Plans and specifications received in one copy in mail of June 9th, 1947 at Malad, Idaho, from Engineer firm of John L. Hoffman and Wm. Alexander of Boise, Idaho, for the building of our proposed reservoir in the Big Malad River stream in our Malad Valley; and the consideration of the revised service expense of said Survey as set by your office for 4 $\frac{1}{2}$ % of estimate of \$75,000.00 for engineering services payable prior to June 30th, 1947 to the said firm of John L. Hoffman and Wm. Alexander out of the appropriated funds for this purpose; by Reclamation Office and Engineer of State of Idaho; and your letter of June 18th received.

Therefore, in conformity with your ruling on 4 $\frac{1}{2}$ % of an estimate not over \$75,000.00 for construction of this Reservoir Dam with its appurtenances there, with necessary and required for engineering services from 1945 appropriated funds for this purpose not to exceed \$3375.00

WE HEREBY ASK the payment of this said sum for engineering services of our proposed Reservoir Dam with its appurtenances, to be built on and in Big Malad River Stream, to the engineering firm of John L. Hoffman and Wm. Alexander, as per their executed Contract for this work in the said sum of \$3375.00, said sum of apply as provided by said contract executed to and with our Board of Directors for Samaria Water and Irrigation Company, as per our agreement with said engineering Firm, on the engineering services to be rendered our said Irrigation Company in the construction of this Reservoir and as per our said Contract; said sum to apply on the entire construction cost of this project as per our said contract. And we also hereby apply for Permit to build Reservoir.

Estimate award on cost of \$75,000.00

Respectfully submitted

State Reclamation Engineer

R-791

Copy in Harris file

Malad; Idaho; June 11th. 1947

Mr. Mark R. Kulp;
Commissioner of Reclamation Engineer of Idaho;
Boise, Idaho;

Dear Mr. Kulp;

Our Board of Directors of Samaria Water & Irrigation Company is now in session, examining the Plans and Specifications prepared by John L. Hoffman and Wm. Alexander Engineer firm of your City on our proposed Reservoir on the Big Malad River stream and which plans have your approval written upon the same as of June 6th. 1947; with a provision stated in the letter of Mr. Hoffman to us with the Plans; to the effect that our present Reservoir, immediately below this proposed dam on same stream through which we may also take out the water of this new said proposed reservoir; for the Spillway thereof be lowered Five (5) feet; that its waters could not reach up to the toe of the said proposed reservoir.

In the discussion of this matter we arrived at the conclusion that this extra expense could be eliminated and saved; by our Company assuring the law; or this ruling of your Department; that the storage of this Reservoir would not be stored at any time above the line that would cause the back waters to reach the toe of the new proposed Reservoir; or that a concrete wall could be built in front of the back waters to guard against any possible back storage reaching the toe of the new dam; or a V shaped construction; which could be built for far less money and serve the same purpose.

That it was also the decision of the Board to hereby ask yourself and our Engineer Hoffman to come to Malad in next few days; that we should meet with you and talk this matter over and further examine the site at same time and then decide the best course to follow and at same time protect us from any un-necessary expense, and the best plan to follow and do in this matter; and that you advise us by return mail when you can make this meeting with us.

Respectfully submitted.

Re: Application No. 27671

Mr. William M. Jones, Secretary
Samaris Water and Irrigation Company
R. D. #1
Malad, Idaho

Dear Mr. Jones:

We acknowledge receipt of your application for reservoir permit to store 1500 acre feet of water from Big Maled River and Big Maled River streams, which has been numbered application No. R-27671, with priority of 11:30 A. M., April 19, 1947, the time the application was filed in this Department.

The correct filing fee on this application amounts to \$6.25 for which we enclose departmental receipt No. 19979. Since it was not necessary to file the application originally sent in for 22 second feet, the filing fee for which amounted to \$10.25, there is a refund of \$4.00 due you, which we enclose in currency.

The plans submitted for inspection by Engineer Services, show that the lower toe of the dam would be submerged by the waters of the Pleasant View Reservoir at spillway level. This condition is hazardous and unsatisfactory, and approval of the present application will be conditioned on suitable assurance that the spillway of the Pleasant View Reservoir will be lowered and kept open so that there will be no submergence of the proposed dam.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

By William M. Jones Its Secty
Wm. M. Jones;

P.O. Address of Secty; Malad, Idaho R.D. No. 1

P-491

Samaria, Idaho; March 28th. 1947

Mr. Mark R. Kulp, Idaho Reclamation Engineer;
Boise, Idaho; State Capital Bld.

Dear Mr. Kulp;

Our Board of Directors is in session today at 8-00 P.M and the matter of your letter of March 11, 1947 acknowledging receipt of our application for permit to store 22 cubic feet per second of the waters of Big Malad River in an earth dam to be built in Sec. 16-Tp. 14-SR 35 E; received by you March 7th. 1947 at 10-15 A.M. and filed of that time; and wherein you stated it was not clear to you what we wanted and intended to be claimed in this application, and to clear this matter in your mind we herewith write you what is intended in this application for permit and what we want that you can make the necessary addition for your Dept. that we want to make clear to you in this application; to-wit;

Our present reservoir Dam is now located in NW $\frac{1}{4}$ -22-14-35E; and the Dam with the waters of Malad River we claim by this application is to be built and located in the SE $\frac{1}{4}$ -NE $\frac{1}{4}$; and NE $\frac{1}{4}$ -SE $\frac{1}{4}$; Sec. 16-14-35E; and this Dam is to be approximately 600 feet length at top and 125 feet length at bottom and 35 feet high from bed of river; and about 315 feet through the dam or width of dam at bottom and about 30 feet wide at top; with its spillway on West side of top of Dam; and Diversion of the waters from this proposed Dam to be taken down the main River bottom channel of this Big Malad River and through the present Reservoir in Sec. 22; and then out of this Reservoir Diversion Canal and on through the same distributing system and canals now used by this Reservoir in Sec. 22; and for irrigating our additional lands now partly irrigated, will enlarge and continue the present distributing Ditches, to handle the additional and extra water we will have for irrigation in this said above first Dam now to be built and claimed for by this application with all the waters of Big Malad River to be stored by these 2 reservoirs on the same main channel, the one now already built; and the other one to be built and claimed for by this said application. The Map with the application, we think shows the proposal very plainly, and the explanation remarks on the map sheet also explains the same. The location we will pick for the new dam in Sec. 16 will hold better than 1800 acre feet of these waters, by possibly reducing the present storage we now have in the reservoir in Sec. 22 a small amount and again save the same in the said Reservoir to be built.

This we believe will explain the same fully for you, and you make make such additions to this applications as your understanding will require to convey the above intent we had in this application or submit the wording in form as you will want to us and make amendment to same for same.

Or we can divert the water from the new Reservoir at its outlet in Dam by new canal to cover higher land to be irrigated when required; this is why this new said Reservoir is important as it can best serve these ~~Malad~~ waters to our lands than can any other source or proposal.

Please receipt this understanding and oblige.

Yours very truly

SAMARIA WATER AND IRRIGATION CO. By William H. Jones Secty.

CC to Board Members;

P. 791

March 11, 1947

Mr. William M. Jones, Secretary,
Samaris Water & Irrigation Company,
R. D. # 1, Malad, Idaho

Dear Mr. Jones:

We have received from you, by registered mail, March 7, 1947, at 10:15 A. M., an application for permit to appropriate 22 cubic feet per second of the waters of Big Malad River.

We are confused as to the intent of this application, as it shows the kind of works to be an "earth dam", and in the Remarks states, "The storage development covered by this application", etc.; and "That we claim by usage and filing all the waters of Big Malad River and are hereby applying for retention of the same by subsequent filing hereby made on same form and with our former filing of 1940 automatically extended by our being forced into World War II."

On account of our confusion, we will review some pertinent information on the situation.

You already hold Storage Permit No. R-637, with priority date of August 25, 1937, on which proof of completion of works was made on March 9, 1940, and on which proof of beneficial use is due on or before September 1, 1948. Acceptable proof that you have stored and beneficially used a definite amount of water would entitle you to a license for that amount. (The certificate of completion of works was for 500 acre feet.)

You also hold Permit No. 19072 for 22 cubic feet per second of the water of Big Malad River, with priority date of August 27, 1940, upon which all proofs have been made, but on which the statutory fees of \$368.00 have not been paid. Our letter to you of March 24, 1943, states, "Upon receipt of these fees, a Certificate of Completion of Works and License will be issued."

If your present application is to cover this same 22 second feet, it is unnecessary. The old permit (No. 19072) is in full force and effect, although not automatically extended by reason of the war.

Note: There is a permit, No. 19645, by the Malad Reservoir Company, of February 19, 1945, claiming 16 cubic feet per second of the water of Big Malad River.

If your present application is intended to cover storage rights (the flow permits cover only the natural flow during the irrigation season) it should be made on Form No. 8, two copies of which we are enclosing.

P. 291

William M. Jones, Secretary
Samaría Water & Irrigation Company
March 11, 1947
Page 2

We are holding your application until we hear from you, as we cannot accept it as a storage application. (A storage application at this time would be subsequent to the application of the U. S. Bureau of Reclamation.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

Malad, Idaho; R.D. No. 1
March 1st. 1947

State Reclamation Engineer;
Department of Reclamation
Boise, Idaho;

Dear Engineer & Dept. of Reclamation;

Please find inclosed application for permit to continue our former filing of 1940 on the waters in full of Big Malad River to be impounded in our proposed reservoir to be built and located in Section 16 Tp. 14 South, Range 35 E.B.M. in addition to the waters of said Malad River now being stored and impounded in reservoir in Section 22 Tp. 14 S.R. 35 E.B.M.

Also inclosed is our filing fee of \$10.25

Please file the same on its receipt, and any amendments that may be desired can be made thereafter. And please acknowledge receipt of same and oblige.

Yours truly,

SAMARIA WATER AND IRRIGATION COMPANY

By William M. Jones Its Secty.

R-791

15. (a) Is reservoir to be used?.....(If so, fill in (b) and (c) below.)

(b) Name of reservoir and number of Storage Permit:

(c) Date of filing of Application for Storage Permit and Name of Applicant:.....

Remarks: The storage development covered by this application is one of a reservoir which will supply irrigation water to the arable lands and the irrigated lands under this system requiring supplementary water and the lands needing additional water, which we intend to supply under our present used distribution water system now using with the small reservoir we now have and use on the lower or southern part of the Big Malad River channel. The reservoir now being proposed for this additional water is located farther up said river channel in SE 1/4 NE 1/4 16-14-35 E. in which we propose to store the waters applied for in this permit.

The lands to be irrigated under this application are shown as per map hereto attached.

and filing
And that we claim by usage/all the waters of Big Malad River and are hereby applying for retention of the same by subsequent filing hereby made on same from and with our former filing of 1940 automatically extended by our being forced into World War II combining all the waters of Big Malad River stored and used with and through these two (2) Reservoirs to be placed on the Malad River Channel, the lower one of which is already now built and used and the other one is now in progress of being built as shown by the maps hereto and this filing, which work on this said last and upper Reservoir was commenced in the year 1946.

BE IT KNOWN That the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

Dated March 1st.
1947.-----

SAMARIA WATER AND IRRIGATION COMPANY
