Re: Permit No. G-33621 (New No. 15-2072)

Rex P. and L. R. Waldron
Box 64
Samaria, Idaho 83252

Gentlemen:

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a person to make proof and relieve the permit holder from making separate proofs of completion of works and beneficial use of water.

The enclosed order modifies your permit to comply with these rules and regulations. As a part of the new procedure, you will be required to publish a notice at your expense for two consecutive weeks in a paper as prescribed by the Department; previously, a permit holder had to publish a notice for four weeks when he submitted proof under his permit.

If you will complete the enclosed forms, we will cause the notice to be published. Should you require additional forms or information, we will be glad to supply them upon request at any time.

Very truly yours,

Gentlemen:

We are writing in regards to the above referenced application to appropriate the subterranean waters of the State of Idaho.

On your application under question No. 7 which should list the kind of works, you have entered the word "flood". Before we can approve your application, we will need a more detailed description of the method of diverting and irrigation you intend under this application. For instance, if you intend to divert this water by means of a headgate, pump, or other means, you should describe this and any other means of diversion or conveyance for the proposed irrigation project.

Also please advise us in cubic feet per second or miner's inches, as to the quantity of water represented in each share of the Samaria Irrigation District.

Your prompt attention to this matter will be greatly appreciated.

Dear Sir, 33621

In regards to your letter enclosed of May 26th. referring to application no. 21-41855. The type of work we are planning on is a pump pumping into open ditches with concrete head gates with the work being supervised by the soil conservation district in Oneida county with long range plans for some concrete line ditch.

In regards to the share in the Samaria irrigation company, a share of water consists of two second feet for 6 hours approximately every 18 to 27 days depending on the supply of water. In the spring when the reservoir ~~is~~ full it is 18 days. Later in the season it is some times 24 to 25 days. We have other ground that is above where we planned for the well that we hope to use the Samaria water on if we have adequate water for the property we are applying for the well on.

Sincerely, Rex P. + J. R. Waldron
