State Reclamation Engineer
Dept. of Reclamation
Boise, Idaho.

Dear Sir,

In regard to making final proof of completion of works and Application of water to beneficial use, I would at this time wish to make a request for extension of time in making these proofs. The filings involved would be G-25745 (William H. Walker and Lena M. Walker), 25802 (William H. Walker) and R-1082.

Due to interference by other wells etc, a lawsuit has been entered in District Court and the final proof and application of these permits will be dependant upon the Court decision. This case was set for Feb. 15, 1965 hearing but conference of the Court and counsel decided to set up a test period to determine the facts involved. There are in that test period now.

As these matters are beyond my control and the Court decision test period etc. will take a considerable, indefinite, period of time, I would like to request an indefinite extension of time allowing me to make final proof on these permits, based upon the decision of Court.

Respectfully,
William H. Walker

Dear Sir:

Under the terms of your permit No. 25802 you are required to complete your diversion works on or before July 12, 1960. I enclose blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion of Works will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.
