Re Permit 8228.

Mr. Harry L. Thomson,
Box 311, Glenns Ferry,
Idaho.

Dear Sir:--

Replying to yours of the 11th inst. would say that an application for extension of time is required to be filed within thirty days after the date specified in the permit for proof of use of water. As this was not done, we could not now accept an application for extension. However, you can make an additional proof of use of water and obtain license for the additional water used but the date of priority will have to be brought down a length of time equal to the time lapsing between the date proof should have been made and the date proof is actually made.

Very truly yours,

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Boise, Idaho,

Feb. 1, 1914.

Harry S. Thomson,
Mound, Idaho.

Under the terms of your permit No. _____, you are required to complete your diversion works on or before _____. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public, Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.
