RE: Permit No. G-24330

Charles W. Burgess
Mendover A. F. Auxiliary Field
Mendover, Utah

Dear Mr. Burgess:

There is little we can give you in answer to your request of June 8.

The field engineer measured the production from your pump as 128 miner's inches on July 23, 1956. There was no note of depth to water.

Your deposition on completion of works and beneficial use of the water made May 7, 1956 shows 60 feet to water.

We have not been able to find a log for your well.

It is possible that the pump bowls are worn to an extent that causes the reduced flow from the well.

Very truly yours,

Dear Sir:

I need some information on my irrigation well to determine whether a lowering of the water table may have occurred, and to plan possible development of greater output.

The well is license # G-24330, 2.24 cu ft sec, priority date of 22 July 1953. Location is in Butte County in the NW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 20 TP5N R26 E8M. Recording is in volume 9 of licenses, page 5793, 10 Sept 1956, in the name of Charles W. and Maurine C. Burgess.

The information I need is output and both static and draw down water levels from checks made by an engineer from your office during 1959, also during either 1956 or 1957.

A static and draw down check made 2 June 1960 was 68 ft 3 inches static level and 93 ft drawdown level. Maximum sustained volume by test about 10 May 60 was 600 GPM. I am under the impression the volume was greater and water levels higher during previous years. To help plan for sustained future use or improvement I would appreciate enough information from the drillers log to indicate type and extent of casing perforations, type and depth of strata at bottom of well and whether there is any indication that the well ends on top of a layer of lava rock.

My address is at the top of this letter.

Sincerely

Charles W. Burgess

Dear Mr. Burgess:

We now have on file the report of our field engineer on examination for completion of works and beneficial use on your permit No. G-24330 which shows that your well located in the NW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 20, Township 5 North, Range 26 East, B.M. will deliver 112 inches or 2.24 second feet of water which has been used to irrigate 120 acres of land in the NE $\frac{1}{4}$ of Section 20.

A Certificate of Completion of Works and License can, therefore, be issued for 2.24 second feet of water upon receipt of the statutory fees amounting to \$5.00 for completion of works and \$8.00 license fee, or a total of \$13.00.

Dear Sir:

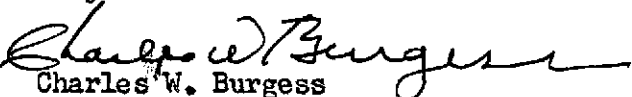

Following my forwarding the papers for completion of works and Beneficial Use under permit Nr. G-24330, I received a letter which stated in part that the law requires that a field examination be made by an engineer of your department before final action.

Your letter also stated your field engineer would contact me at the time he makes the examination in order that I may show him over the ground.

If it is absolutely necessary that I personally escort this engineer over the ground, I request that you give me several days notice at the above address. I am in the Air Force and stationed at Hill AFB, near Ogden, Utah, so can only get to my place in Idaho when work permits, and then only with prior arrangements on the base.

If it is not absolutely necessary that I escort the engineer, I prefer he contact Mr. Duane Nation, Box 4, Moore, Idaho. Mr Nation is farming this property on lease and is at least as familiar with the well and irrigation as I am. Mr Nation is well known and will almost certainly be somewhere in the vicinity at all times.

RE: Permit No. G-24330

Mrs. Charles W. Burgess
Box 5
Hill Air Force Base, Utah

Dear Mrs. Burgess:

We return the Assignment of Permit No. G-24330 from George Douglas and wife to Charles W. and Maurine C. Burgess which has been recorded in this department.

We also enclose departmental receipt No. G-1360 for the fifty cents recording fee.

If the works have been completed and the water applied to beneficial use, the proof may be made at this time, although these proofs are not actually due until July 28, 1958.

Before these proofs are made, the law requires publication once a week for four weeks in a county newspaper. This notice should be made in duplicate on Form 36 enclosed setting the time and place and naming the notary public before whom the proofs are to be made.

Both copies of Form 36 to be returned to this department together with Form 11 which is authorization for us to have the notice published at your expense in the designated county newspaper.

We shall then send a copy of the notice to the newspaper with instructions in regard to publishing and shall send you the forms of deposition to be executed by yourself and two witnesses in making the proof.

Dear Mr. Kulp:

My husband (Capt. Charles W. Burgess) and I purchased the land to which Permit No. G 24,330 for a deep well pertains.

Last spring a pump and diesel engine were installed and water was pumped to irrigate land planted in potatoes and barley and this well will be used for the same purpose this year.

I am writing in regards to having this permit transferred to our names (Charles W. and Maurine C. Burgess) and also to request application forms for proof of completion of works and application of water to Beneficial Use.

This permit was obtained by George Douglas of Arco, Idaho on July 28, 1953.

We will appreciate any information you can give us regarding this matter and will forward any fees due upon receipt of your letter.

Sincerely yours,
