George A. Judah, Vice-President
Utah Mortgage Loan Corporation
Logan, Utah

Dear Mr. Judah:

Replying to your letter of January 19, 1960, the status of the permits about which you inquire, is as follows:

Permit No. 20863 - filed March 22, 1955 by Hope Land & Water Co., Inc. for 40 c.f.s. of water from wells. Completion of works was made and certificate issued on December 20, 1956 for 4.72 c.f.s. Proof of beneficial use was due May 3, 1958 and has not been made. The permit was assigned to Sweet Sage Water Corporation on December 4, 1959.

Permit No. G-25535 for 15 c.f.s. and Permit G-25536 for 14.4 c.f.s. were filed on March 22, 1955. These two permits appear to cover the same land and why they were filed in two parts instead of one, I donnot know. The latest action on these two permits is assignment to the Sweet Sage Water Corporation, Inc. Proofs upon these two permits are due March 28, 1960.

Until the proofs are offered it is impossible to forecast what development might take place in connection with the objections which might be offered by other people in that vicinity. At present these is no pending litigation affecting the water right implied by the permits.

A protest was filed on April 25, 1955 against allowance of Permit No. 20863, but files do not indicate that any action was taken on this protest.

Re: 33-7061 and 33-2075

Gentlemen:

I have enclosed the following items for processing in regard to the referenced water rights:

1. Proof of Beneficial Use for 33-7061;
2. Application for Transfer of 33-7061;
3. Application for Transfer of 33-2075; and
4. Check for $100.00 to cover filing fees.

In way of explanation, 33-7061 was filed on the same hole as 33-7053. The intent was to pick up additional water for existing acreage and possibly expand acreage after land was cleared and developed. Because of high farming costs and the Swan Falls litigation, the decision was made not to spend the money developing additional acres. Nonetheless, the extra 2.8 cfs provided for in 7061 was applied to existing acreage to bring the water to the maximum .02 cfs/acre allowed by law. Proof of beneficial use is being submitted in order to meet the June 30 deadline agreed to in the Swan Falls settlement. At the same time, an existing unused 20" hole in the NW1/4NW1/4 of Section 1 was discovered. This location will be more conducive to using the existing distribution system, and will also be closely located to any ground likely to be developed in the future. Of course, at such time as a decision may be made to develop new ground, an appropriate amendment or application will be made, depending upon the circumstances. Please advise if you need anything further.

Re: Permit No. 20863 - G-25535

George A. Judah, Vice-President
Utah Mortgage Loan Corporation
Logan, Utah

Dear Mr. Judah:

Replying to your letter of January 15, 1960, the status of the permits about which you inquire, is as follows:

Permit No. 20863 - Filed March 22, 1955 by Hope Land & Water Co., Inc. for 40 c.f.s. of water from wells. Completion of works was made and certificate issued on December 20, 1956 for 1.72 c.f.s. Proof of beneficial use was due May 3, 1958 and has not been made. The permit was assigned to Sweet Sage Water Corporation on December 4, 1959.

Permit No. G-25535 for 15 c.f.s. and Permit G-25536 for 14.4 c.f.s. were filed on March 22, 1955. These two permits appear to cover the same land and why they were filed in two parts instead of one, I do not know. The latest action on these two permits is assignment to the Sweet Sage Water Corporation, Inc. Proofs upon these two permits are due March 28, 1960.

Until the proofs are offered it is impossible to forecast what development might take place in connection with the objections which might be offered by other people in that vicinity. At present these is no pending litigation affecting the water right implied by the permits.

A protest was filed on April 25, 1955 against allowance of Permit No. 20863, but files do not indicate that any action was taken on this protest.

Very truly yours,

**Gentlemen:**

The date for proofs of Completion of Works and Application of Water to Beneficial Use, as set out under the terms of Permit No. G- see above are due not later than March 28, 1960.

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list which has been recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least forty (40) days before the mentioned date, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two two witnesses), the quantity of water filed; for what purpose it is used; the point of, or points of diversion; and the location of use of the lands which are irrigated -- all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with Form 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named and before the notary public, as advertised in the publication notice.

Remarks:

Please see attached map. This application is to replace the undeveloped part of permit # 20863. It is respectfully requested that we be allowed to make this new filing so that we may have time to complete this development.

All of the wells in this application are located on right of way from United States Government approved November 18, 1952 and from State Of Idaho Easement # 882 dated Sept. 29, 1948.

Dear Mrs Anderson:

Attached please find two applications which will replace the undeveloped portion of Permit #20863.

Please note that we have kept the Bond in force so that it is already available for these new filings.

I have split these into two separate filings in the hope that we will not have to advertise again. It seems I recall that filings under a certain amount do not require advertising.

Attached is check for $17.50. If I recall correctly, the fee is five dollars plus twenty five cents per foot of water. If this amount is not correct kindly advise so I can send whatever is necessary.

We will certainly appreciate your getting these new permits completed. Trust they are all in order.

Yours very truly,

Hope Land & Water Co. Inc.
