Pr: Permit No. 63-12559

Dear Sir or Madam;

Eagle Water Company is requesting an additional time extension of two years for the above listed permit for Eagle Water Company Well No. 7. This letter supplies information required on form no. 204. This is an additional extension to the one granted in 2004. More work has been completed since our letter dated February 26, 2004 but the well has not been completed at this time. A driller has been selected and a contract has been signed as of this date. He is very busy and does not think he can finish the drilling in time for the pump to be installed, the pump house completed, and tied into the existing system before the March 1 expiration of the permit. A pilot hole has been drilled to depth and we are waiting for the screen to be delivered so the Well can be completed and tested. Then the appropriate pump and motor can be selected and installed. The pump supplier tells us to expect 6 to 8 weeks for delivery.

We have not received approval from Eagle City for the well house which is ready for submission and do not have approval from the Public Utilities Commission to include this cost in the rate base.

We hope this provides the required information needed for the extension. I will be available if additional information is required.

Sincerely

James M. Rees, P.E.
