Roger,

I am forwarding an email from Gary Mulkey. It should probably be included in the file for the Williams Lake Recreational Water and Sewer District applications for mendment.

Subject: Williams Lake

The Williams Lake Home Owner Association recently sent out it's year end newsletter. I wanted to bring your attention to the article from the Vice President, Richard Borst (also Water Board member). His comment referenced an Executive Meeting where they discussed the "possible addition of several water connections becoming available". Comment further states that the Water Board has been working to change from the Recreational District to the Municipal District "so that a few hopeful property owners may have the ability to build in the future" It also states "Recreational Water District restricts water availability to the existing homes at Williams Lake only. The Municipal Water District would allow more homes to be added to the water system".

My question is this. Has IDWR made any changes to the Condition of Approval as indicated on the Application for Amendment to number 75-07589, receipted 9/22/05?

This Application for Amendment places the Rate of Diversion at 0.21CFS and Annual Volume at 38.4AF. As you stated in your e-mail dated 10/12/05 this amount of water equates to 64 homes.

My concern continues to be that the Water Board, from the comment above continues to feel that they are getting more water for a "hopeful few".

I have stated before that I would like IDWR to make its own count of homes at Williams Lake and also consider BLM, Forest Service and the Resort.

I still feel that the Water Board will give out at least TWO more water connections as I feel there is only 62 homes and never any mention of the water to BLM, Forest Service and Resort.

The last I heard from IDWR, you were asking for dates to hold the hearing. Those responses were to be back to Idaho Falls by 12/21/05.
Has a date been set at this time?

Thank for your time,

Gary M. Mulkey
