Re: Permit 37-20834 / Walker Sand & Gravel

Dear Allen:

Enclosed is a Request for Extension of Time for the above-referenced permit. Substantial progress has been made toward developing the water under this permit. A new well has been drilled and tested. The old well will operate as a backup well and will be tied into the system; these infrastructure modifications are underway. The additional time is needed to allow final modifications to the infrastructure and to allow a field examination to be conducted when the system is operational (the gravel plant is essentially shut down during the winter). It is anticipated that the field exam will be conducted in summer 2006.

Cordially,

Charles G. Brockway, P.E.
