Describe the reason for the proposed changes

Transfer water from irrigated to a large dairy to be built on a portion of the property. Two irrigation wells will be converted to dairy use, and a third well may be drilled if needed. Although surface rights have also been claimed on this property, only the groundwater rights have surved these two farms for a long time; the surface rights are used on other land that we own. We understand that the place of use for the surface rights will be reduced accordingly if this transfer is approved. All of the land we own in Sec. 23 & 24 will be sold to a third party within the next six months.

4. FOR CHANGES IN NATURE OF USE ONLY

A. Describe the expected quantity of the return flows and location of discharge after the proposed change

Water will be ponded and land applied as needed. Dairy wastewater will be used to irrigate some of the land that is being dried up to provide water for the dairy. After the transfer, only six pivots will be operated on these two farms with irrigation ground water.

B. Describe the effects on other water uses resulting from the proposed change

Irrigation use will be reduced to supply water for the new dairy.

5. Total Amounts Transferred

Dear Matthew Thompson,

Upon receiving your fax, we here at the Oakley Canal Office looked into the matter of ground water delivery to 900 and 700 West and 1100 and 1200 South. According to our records we have not delivered surface water to that address in the last five years.

If you have any questions concerning this matter please feel free to call our office Mon.- Fri. from 9a.m- 2p.m. or you may reach me Clint at 208-260-0833.

Sincerely,

Clint Muhlestein

Pivot WC6 - in order to get the 19.5 acres needed to reach the 1452 acre feet needed this pivot would need to be shortened by 93 feet. This pivot would be moved to the north west to best fit the location and to allow the dried up ground to be used better for the site.
