

SPLIT TREE FOR WATER RIGHT 61-270A

H. P. Honeycutt originally owned water right 61-270A, and the property where the water right was appurtenant. Mr. Honeycutt then split his property into 4 separate parcels. Mr. Honeycutt then took it upon himself through the ownership documentation to divide the water up between the individual lot owners using only the rate of diversion and did not take into account the acres irrigated. Water right 61-270A with an attached shape file was decreed in the Snake River Basin Adjudication (SRBA) before the splits could be processed through the Idaho Dept. of Water Resources (IDWR). Unfortunately, the amount of water each new owner was allocated by Mr. Honeycutt through the ownership documentation did not match an intersection of the tax lots and the shape file that was associated with the decree for water right 61-270A. Mr. Honeycutt then passed away, and the task of updating the water rights was left up to the current owners. This transfer was filed by one of the Owners, the Flones, to correct their portion of the water right. Each of the other owners may also need to file transfers to ensure they can irrigate the lands they need under the water right.
