Re: Error on GIS Boundary for POU

The water right owner, Werner Meserth, emailed a request to correct the POU shape for the water rights noted above. Results of my review support Mr. Meserth's claim and indicate that the correct POU should be east of the shape created for SRBA review (see attachment 1 for SRBA shape).

SRBA reviewer noted that location information was limited for 65-10784 (see attachment 2), so the shape was created from a rough map included in the application for permit for 65-12282. Attachment 3 is a copy of the application for permit for 65-12282. The application indicates that 65-10784 is used for the same purpose. The map is not detailed and does not appear to be accurate. The map appears to designate a full QQ for the POU. It does seem to show that the POU is east of the pump diversion on Anderson Creek. If one assumes that the irrigation occurred down-gradient from the ditch (from alternate POD), then the POU must be located between the ditch and Anderson Creek. This conclusion is supported by a map included with the field exam for 65-12282 (attachment 4) and county taxlot information (attachment 5) showing location of Meserth property.

The GIS shapes for the POU for the two rights will be updated to show the property owned by Meserth.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 65-12282, and said application is hereby approved.

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before December 1, 19 84.
- c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.
- d. Other: (1) The issuance of this permit in no way grants any right-of-way or easement across the land of another. (2) Use of water under this permit is subject to control by the watermaster of State Water District # 65, Payette River. (3) A lockable device, subject to the approval of the Department, shall be installed on the diverting works in a manner that will provide the watermaster suitable control of the diversion.

Witness my hand this 21st day of December, 1979.
