Mr. Meserth,
I have reviewed the files and agree that the boundaries for your place of use are incorrect. I have updated the records to indicate your property boundaries. Please note that you may not see an update on the public web site for a week or more.

Thanks,

Jeff Peppersack, Manager
Water Right Permits Section

Subject: Meserth, Claim No(s) 65-10784, 65-12282

From Werner and Judith Meserth
Claim No(s) 65-10784, 65-12282

Sirs,

After reviewing our water rights info we found a problem. Years ago you sent us a colored map, dominantly red in color, with listings of our claims, their locations, points of diversions and place of use. The map is dated 11/22/1999. You can also find a copy of this map in our computer file claim 65-10784 under 'Related Documents' (adobe doc.).

The problem is that the green outline, designating 'place of use' is drawn in the wrong direction. Our four acres that are irrigated (claim 65-10784 is one acre, claim 65-12282 is three acres) are roughly north and east of the diversion point. On the map the 'place of use' line should go north from 'point of diversion' to just west of the bottom of the 1 (of the S 14 letters), then turn east to the road, then follow the road south - east to the 'SESW' corner and back to the point of diversion.

If you need this info send per mail instead, please let us know.
Let us also know if this correspondence is or is not enough to correct the problem.

Thank You,

Werner Meserth
