Re: transfer evaluation

This transfer proposes to add an existing well to the two well system for this potato processing plant to ensure that they receive their water supply in case of a well failure. Correcting the legal for the place of use, should be in two QQs and points of diversion which are in the NWNWNE.

Authority to File:

Applicant provided tax notices and is the owner of record as far as SRBA decree and water right license. The plant manager signed the transfer.

Water Right Validity:

One water right was decreed in the SRBA in 2002. The plant is in use daily. Forfeiture is not an issue.

Injury to Other Water Rights:

Inside the ESPA area and in North Groundwater measurement district. Adding a well within the place of use, no cell change. Transfer will be advertised to determine any protests.

Enlargement of Use:

There is no evidence of enlargement of use.

Local Public Interest:

No issues identified.

Beneficial Use / Conservation of Water Resources:

No issue identified.

Review of the application finds there is not clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
