Shelley,

I have forwarded your question on to Chuck Brockway. Please call me after you have reviewed in greater detail with any other questions. I recognize your priorities with the adjudication but anything that can be done on this one sooner rather than later would be greatly appreciated.

Thanks,

Travis

Travis,

Because IDWR is focusing on permitting and on licensing permits that have been claimed in the SRBA, I've had time to only to glance over the information you provided for Permit 47-8278. At first glance I am concerned by the annual volume recommended for licensing by the field examiner. The permit was issued for 450 dairy cattle, but the volume recommended for licensing appears to account for 900 milking cows, 400 heifers, 200 calves, and 275 dry stock. Because of the limit on the permit, IDWR will issue a license only for the amount of water used by 450 milking cows or their equivalent. IDWR will probably have to ask for a supplemental field report to make this adjustment. I will look it over in detail as soon as I can.

Shelley,

Have you had a chance to review my letter of Sept. 12th yet re: the Phoenix-Dairy LLC water right and the information provided for purposes of licensing yet?

Thanks,

Travis
